White Stains on Hardwood.
 A mixture of salt and olive oil will
 remove white stains from hardwood
 which are caused by hot dishes. The
 dry spot is covered thickly with salt,
 and then as much olive oil is poured
 over as the grains will take up. This
 stands over night, and in the morning
 the discoloration should be briskly
 rubbed with the mixture, which is then
 wiped off. If there is still any trace
 of stain, the application is repeated,
 again standing for hours.

Ventilation Affects Soil.
 Ventilation of the soil has been
 found to affect the growth and quality
 of plants.
