## Service the True Function

Primitive man was dependent upon his own efforts for the necessities of life. Heat and light came from fuel dragged from the nearby woods. The only power was man's brawn and the domestic beasts.

Today public utility companies supply very many of our daily necessities.

This is pre-eminently true of the gas business. Your Gas Company is not content simply to supply you with so many thousand cubic feet of gas. It furnishes gas when and where and in what quantity you want it. It virtually cooks your meals, heats your room, lights your home. It offers you a service you could not do without, and back of it are trained labor, substantiating together to merit your good will, trial investment and a directing genius, all by efficient, faithful service.

Gas never fails!
