**SIMPLE WAYS TO SAVE GAS**

We want you to limit the amount of gas you use to your exact needs. Here is a way to do it.

If you are boiling water, do not heat a quart when a pint is enough. When the water comes to a boiling point and you wish to keep it there, it is not necessary to leave the gas on full to do so. Turn it down. Water violently agitated with a tremendous heat under it is only escaping in the form of steam.
