Ingenious Scheme Failed.
When I was in the seventh grade at school, relates a correspondent of the Chicago Journal, there were two girls I thought I was in love with, but I could not decide which one I liked best. So one day I thought I would write each a nice love letter exactly the same and I would then choose the one who answered the most favorably. But when they got their letters, each let the other know, so as to make her jealous. I wrote each again, but I got no reply at all.
