

Real Help for Home Builders

We want to help you with your home building plans. We realize that almost everyone in the community, not now owning a home, is seriously thinking of building. Already many people have decided that it is useless to wait for lower prices. We want the opportunity to right the impression that some folks have that building materials are high in price. With the building boom which is sweeping the country, and which can easily be seen here, will come a demand for building material which will tend to advance prices on everything. RIGHT NOW materials are low. Better decide to use the Lord Lumber Company service and build NOW!

ARE YOU PLANNING A STURDY SEVEN ROOM HOME?

It is such structures as this that carry within their four walls the real spirit of home. It is a sturdy square house, still with enough intelligent arrangement of home comfort. It is the ideal seven or eight room house, all depending upon the extent of finish one cares to put on the sleeping porch on the second floor.

The arrangement of dining and living rooms on the first floor brings them both to the front of the house. The entrance being at the side—is particularly convenient to arrangement for driveway uses also. There are toilets on both floors.

One of the nicest features is the broad stairway out of the living room and the big fireplace at its foot.

We have hundreds of plans. Among them you are sure to find just the home you have been desiring. If interested in building, come in and talk it over.

We Are Here to Serve

Since 1886 the Lord Lumber Co. has given the people of this and other communities a real building service. It is this fact which has enabled us to keep abreast of the times in home building and so give home lovers an opportunity to take advantage of our offer to help with their problems.

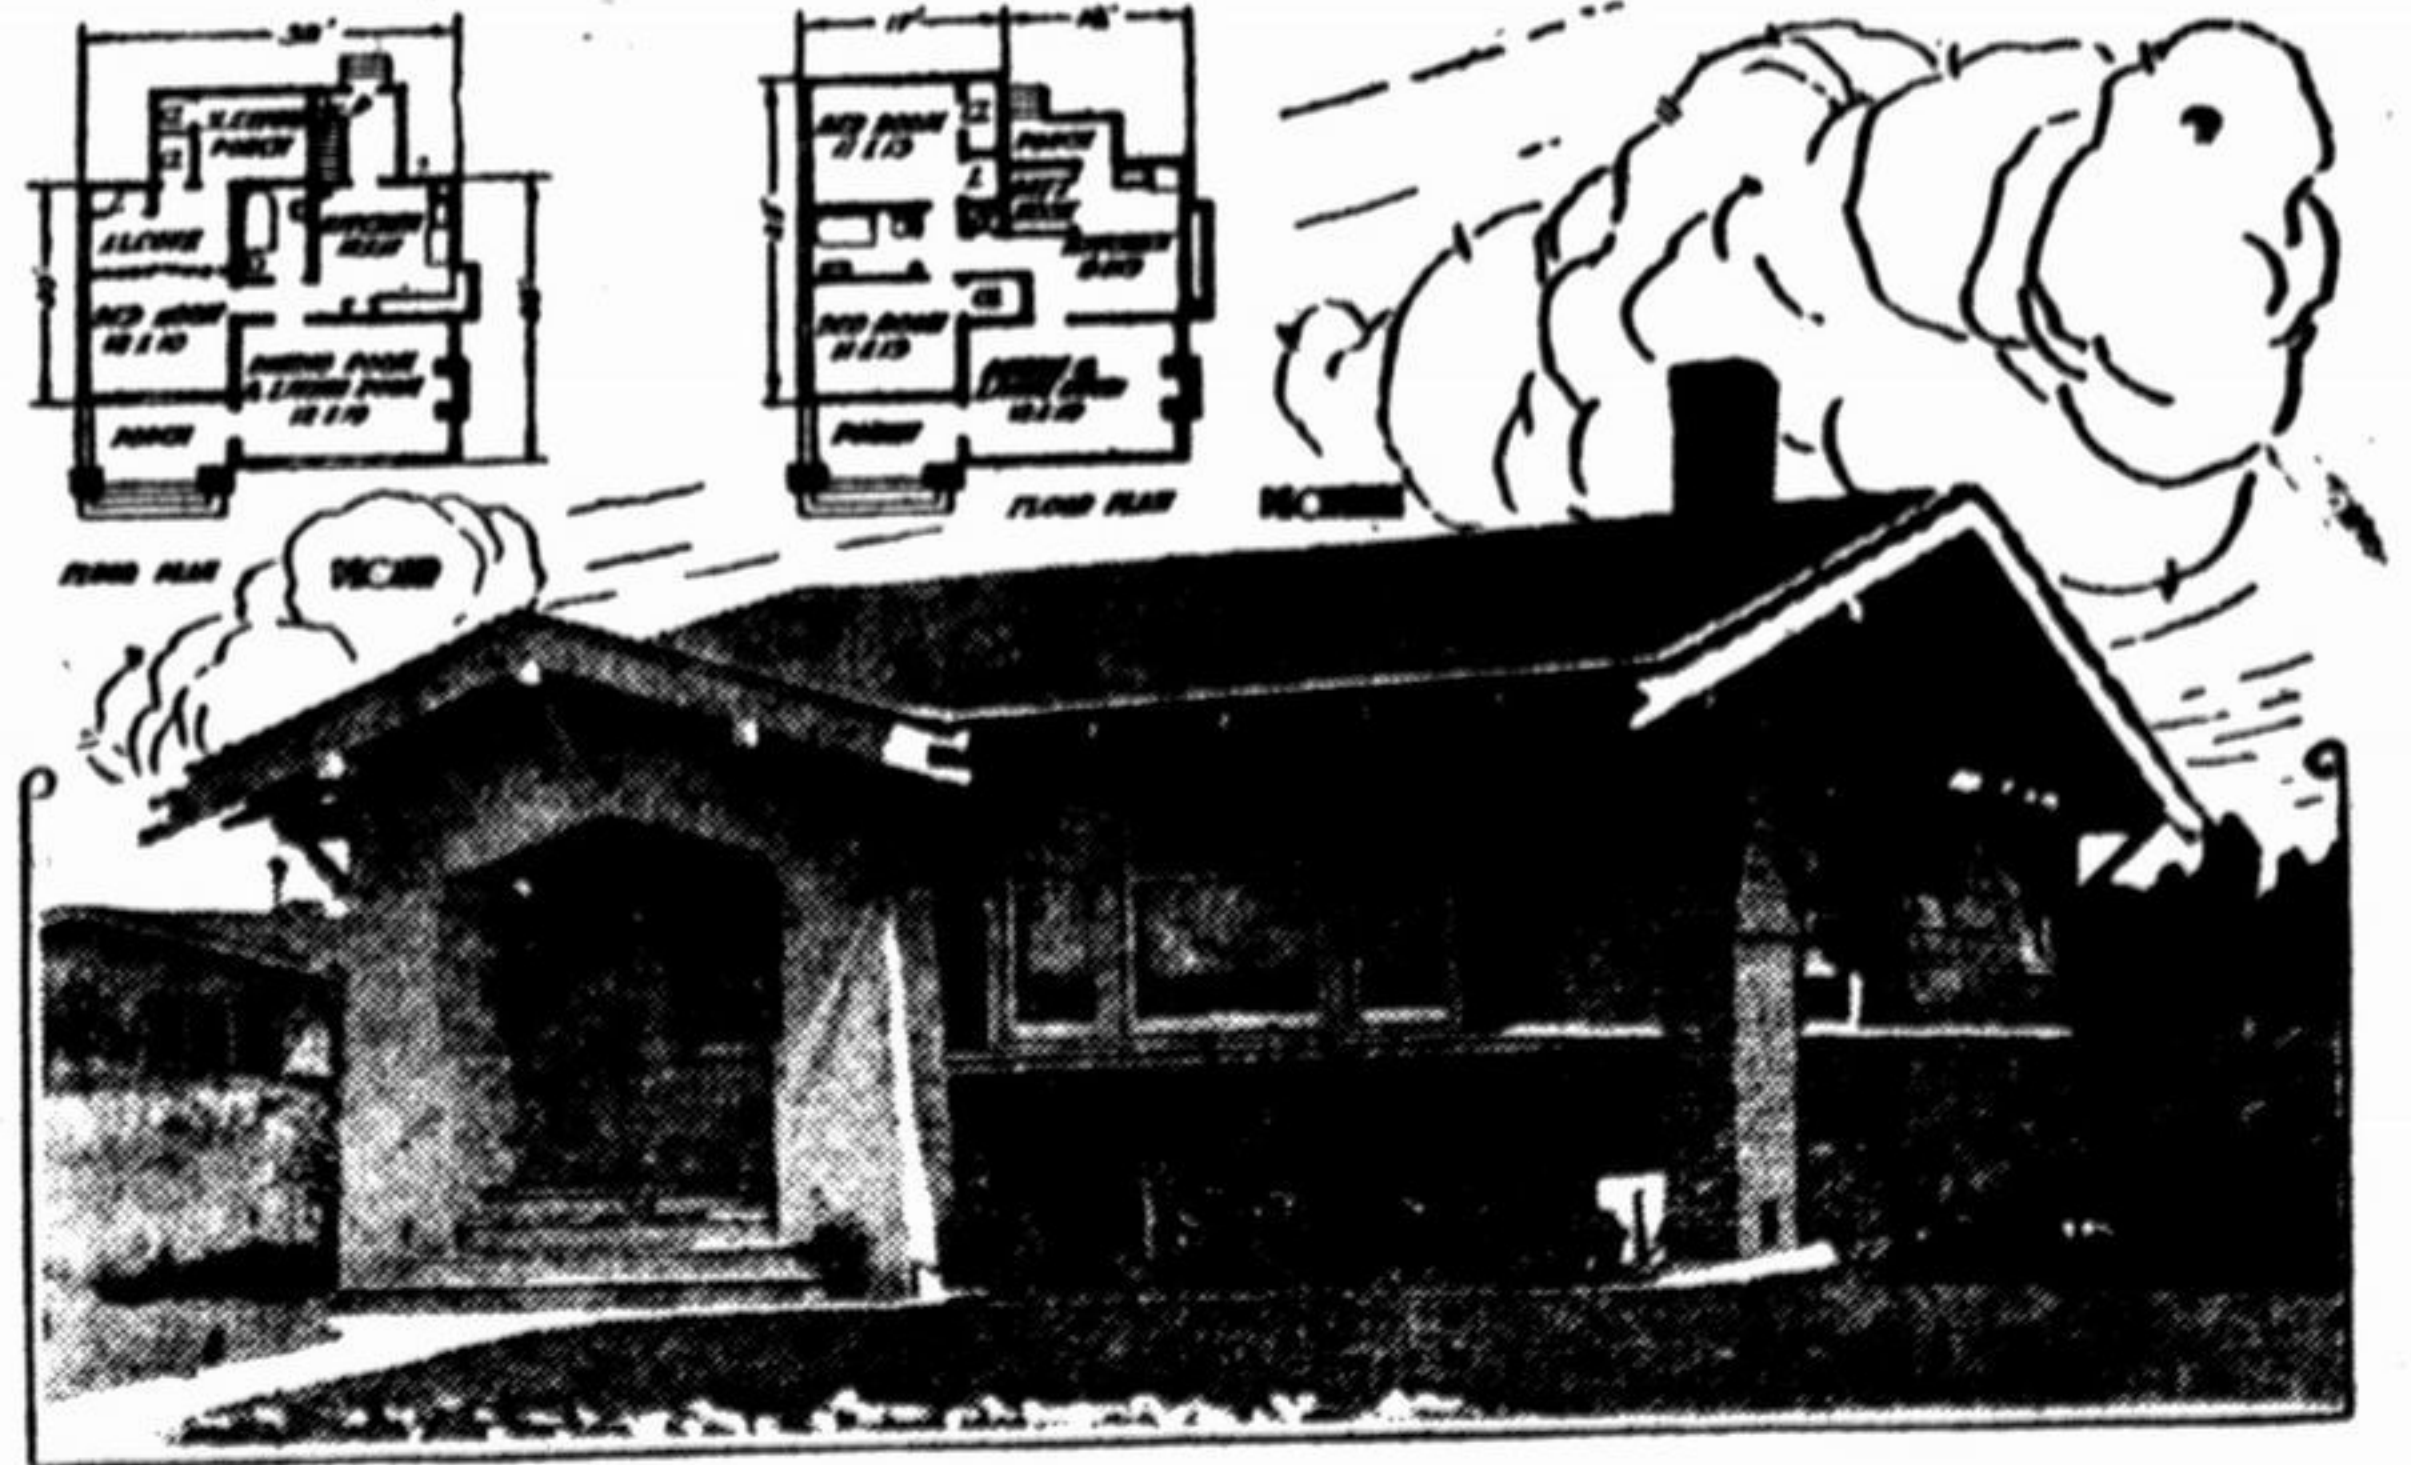

Through all these years we have always made it a hard and fast rule that only the best of everything would go out of our yards. People have been lured away with the idea of getting material "cheaper" but have found that a cheap price really means "cheap" material. The best of materials are none too good to put into a HOME, a place where you expect to spend the rest of your life. Those are the kind we deliver to that vacant lot which your dreams have pictured with a home, a lawn, a little garden, flowers, trees and shrubs. But to endure, that home must be built of good materials. That's why we handle only that kind.

COZY FIVE-ROOM BUNGALOWS ATTRACT MANY

The choice of two floor plans is offered the home builders who choose this cozy five-room bungalow of cement and wood. One plan is for an exceptional big bedroom and sleeping porch while the other permits of one bedroom, an alcove room and sleeping porch. A big, 12x19 foot living room is used as combined dining room. A built-in Pullman breakfast room is featured in one plan.

It is remarkable the large closet space worked out in the DeChenne plan. The terra cotta entrance—the wide brick mantle and the excellent window arrangement are all features which appeal to most women.

A bungalow is about as cozy a home as one could wish to have. There is a certain charm about them which is hard to put into words, but nevertheless is there. We have many plans for bungalows, some of them large, some small, all of them will suit a certain taste and all of them are real homes. If you have in mind the building of a bungalow home, step in and look over our plans. You are sure to find something you want.

What May You Expect?

We have hundreds of plans. They include bungalows, cottages, two story houses and the more pretentious places. We have, through years of experience, accumulated a fund of knowledge which is at your disposal. We have an estimating department which will give you figures on short notice. We ask nothing better than to be able to serve you—to be able to advise with you—and more than likely, to be able to clear up some point which is now bothering you. Don't hesitate a moment, come in and talk over with us your ideas of YOUR home. Our service and advice are both free and we are never happier than when we can be of service to Downers Grove home builders for we know that the more homes the more contented people and as a consequence, a better Downers Grove.
