HEARS SERMON OF PASTOR BY RADIO

Mr. and Mrs. H. A. Gardiner "Listened in" When Rev. MacWhorter Preached by Wireless

H. A. Gardiner, formerly superintendent of the water and light department of the village, is a wireless enthusiast. The following story clipped from the Woodstock American, shows he "listened in" when the Rev-Hugh MacWhorter preached the sermon from the KYW, Chicago, sever-

What is the world coming to, when one can sit up in bed on a Sunday morning, adjust the radio, and listen to one's favorite pastor preach perhaps hundreds of miles away; shut off the connection if the sermon is dull, turn over and take another loud snooze without interrupting the service.

Perhaps H.A. Gardiner, of the Mc-Henry County Electric company had arisen for the day, although paper cannot vouch for the fact, but that is what he heard on radio last Sunday. He noticed 9:45 a. m. Bible School and Men's his radio announcement card for the week, that the sermon of the Rev. Hugh MacWhorter of the Episcopal church of Downers Grove would be broadcasted that morning. So p. m. Union Service on the "horned in," and Mr. and Mrs. Gardiner sitting in their home in Woodstock listened to their former pastor, and distinguished the voices of several of their friends in a quartet that sang during the service held in KYW Station, at Com. Edison Co., Chicago. A receiving set in his Lisle fair a great success. church at Downers Grove enabled his congregation to hear him also,

fit for about six months, and spends ville creamery. his spare time perfecting its fine

PREVENT OUTBREAKS OF INJURIOUS PEST ---

Control Webworms in Corn by Cultural Methods.

After Crop Is Once Planted and Field is Found to Be infested There le No Practicable Way of Getting Rid of Them.

(Prepared by the United States Department of Agriculture) the Middle Eastern states can be pre-

cording to the bureau of entomolog of the United States Department of structive pests, the various species of webworms are all natives of Amer ica and have not been introduced from foreign lands.

Summer or very early fall plowing should be practiced. Plowing in late October or November has little effect because the worms are already in their winter webs under the surface of the ground. Land that has been in sod or pasture, or lain fallow and grown up to weeds and grass should he plowed in July or August, if it is intended to plant it to corn the fol-

Grasslands of all kinds meadows, pastures, or lawns-furnish the nor mal food of sod webworms, but they also gnaw young corn plants below the surface and deform them so i prevent the production of grain After the corn is once planted and the field is found to be infested there no practicable method of getting rid of the worms; the only thing the can be done is to produce conditions that will permit the corn to grow h epite of them.

Disking in the spring, the application of fertilizer, and the sowing of sound seed are the chief preventive measures that will have any effect. Netther poisening nor trapping has me with any success.

Services for Sunday, August 20. Sunday School at 9:30 a. m. Preaching Services at 10:30 a. m. & at 7:80 p. m. Sermon Themes -Being a Good Church Member" and "Our Commonplace Lives."

Wednesday, 7:30 p. m., Midweek of land, has been secured by Service; Theme, Our Resting Times. Elmhurst hospital for a building Thursday, August 24 for a mornnig north side of the St. Charles road, and afternoon work meeting with two and a half blocks east of York lunch, at the church.

A. L. ALLISON, Minister

Miss Rosella Porter has been on a vacation the last two weeks. Monday, August 7, at the Naperville First Ev. church, she was a maid of honor at the wedding of her friend, Miss Lela Shrock, of Kokomo, Ind., who was united in marriage to Mr. Clarence Wittenbraker, secretary of the Naperville Y. M. C. A. The wedding party had dinner at the LaSalle hotel, Chicago, after which Rosella left immediately for Monroe, Wis. to whistle two selections before the marriage ceremony of her college room-mate, Miss Frieda Miller, who on Tuesday was married to Mr. Willard Muehl, of Seymour, Wis. Immediately after the wedding reception Rosella journeyed to Kokoma, Ind. to attend the wedding of two other college friends, Miss Lorraine Shrock, of Kokoma and Mr Howard Bauernfeind of Chicago. She visited in Kokoma a few days returning to Lisle Friday night and is this week visiting friends at

Mr and Mrs C. Plumb and daughter Dorothy, of Downers Grove, spent Sunday with their parents, Mr and Mrs W. Plumb.

Mr. and Mrs A. Porter took dinner on Sunday with Mr and Mrs Albert Lacey and family.

Ed. Smith spent Sunday with his sister, Mrs. J. Fender and family.

Most of the threshing is done in this vicinity and the yield of grain is pretty good.

Mr and Mrs W. A. Rogers entertained for their sons on Sunday at Warwood farm.

Mrs C. Coltman and son, Edward; Mrs Harker and son, George; Mr and Mrs N. Cleminson and daughter. Viola and Mr Earl Kidd, all of Chicago, were visitors at the home of Mr and Mrs A. Porter on Thursday of last week.

POISON BAITS WILL KILL OFF CUTWORMS

White Arsenic or Paris Green Will Prove Efficient.

neects Are Especially Fond of Tomatees, Cabbage, Lettuce and Other Vegetables - They Are Voracious Feeders.

Prepared by the United States Department Cutworms can readily be controlled by the use of poisoned bait, the United States Department of Agriculture has demonstrated. This is the way to prepare and apply the poison:

To one bushel of dry bran add one pound of white arsenic or paris and mix thoroughly into a mash with four gallons of water, in which has been stirred one-half galion of sorghum or other cheap mo-This amount will be sufficient to treat four or five acres of cultivated crops. After the mash has stood for several hours scatter it in lumps of about the size of a marble over the fields where the injury is beginning to appear. Put it about the bases of the plants which have been set out. Apply the mash late in the day, so as to have the poison in place around the plants before night, when the cutworms are active. Apply a second time if necessary.

Cutworms destroy hundreds of thousands, even millions of dollars' worth of crops every year throughout the United States. They especially attack tomatoes, cabbage, lettuce and other vegetables that have been started under glass and transplanted. Cutworms sometimes appear in great numbers in the spring and early summer, and frequently do severe injury before their ravages are noticed.

Their method of attack is to cut off the young plants near the ground. They are of large size and are voractous feeders, capable of destroying many plants in a single night. Often they cut down more than they can devour.

Facts About the Ostrich. The ostrich is the biggest bird on earth and has the smallest brain. It weighs as much as a cow and its brain weighs two ounces. Yet it is not stupid. The ostrich lives to be about ninety years old.

LAND FOR ELM-HURST HOSPITAL HAS BEEN BOUGHT

Road to Be Site of Humatarian Venture
