CONCRETE is not a new material in the erection of farm buildings.

It is indispensable in construction of silos, watering troughs, fence posts, retaining walls, barns and houses.

But—there has been a limitation. Why not concrete walks for the farm. Never thought of it, huh? Well, its being done. Not just a single walk from hitching post to house but walks, approaches and drives—a yard complete.

No matter what you plan building this fall—we want to furnish the materials. Let us help you plan.
