Hours Required 12 to 14 years ....... 9-10 ton, of Milwaukee and Hugh, of the church, officiated and burial was Margery Potter , motored with Mr Children grow mainly while sleeping or resting. Do you want your child to grow up stunted?

Tired children learn slowly, make little progress in school and often drift to the bottom of the class. Do you want your children to grow up stupid?

sleep is often disturbed by dreams and they do not get complete rest Do you want your children to sleep badly and become nervous?

conduct in his school and home life. Insufficient sleep drags it backward opinion, to arrive at the very zenith and downward. Which do you want for your child?

Tirenome children are often only tired children. Will you put the truth of this to the test?

Time spent out of bed means more wear to children's clothing and shoes.

Why not save such wear and tear? A tired mother might get a quiet boar or two if the children were in bed by 6:30 p. m. Why not take ad-

vantage of this? The fact that a neighbor's child is sent to bed too late is not a good reason for sending your child to bed too late. Two wrongs do not make a right.

Going to bed late may become such a bad habit that it may become difficult, to cure. Establish a curfew hour in your home.

### AUTO DRIVER MUST TAKE CARE IN CITY

Law Regulates Traffic in Streets for the Protection of the Public.

Special provision is made by law for the regulation of automobile traffic in cities and every city has its own additional regulations, but the automobile driver should also exercise his judgment and observe whatever other rules seem advisable, Secretary of State Louis L. Emmerson de-

"Under the law, an automobile must not approach closer than ten feet behind a street car which is loading or unloading passengers," he continued, "In some rities where there are safety sones, autos are allowed to pass if ther do so slowly. The driver should remember that persons alighting from a trolley car are sometimes bewildered and do not know which way to go.

Too much reliance should not be placed in the use of the automobile born in city streets. The machine should be operated at a speed which permits stopping within a few feet in case pedestrians do not heed the denal and walk in front of the car. The driver should remember that some people are deaf and that others are naturally heedless. A group of one in the middle of the street, startled by the sound of the horn, may scatter in opposite directions and an immediate stop by the automobile is the only way in which an accident can be avoided. Signe indicating the proximity of a school building should always be heeded by the driver in order to avoid striking children when they run into the street in

need new supply of Nitrogen. The more we get power from of wells the greater the need is of obtaining nitrogen from the air. A vast amount of fertilizing material has been lost to American agriculture through the crowding out of millions of borses by millions of gasoline-driven vehicles,

### Daily Thought.

Whatever you would make habitual, practice it; and if you would not make a thing habitual, do not practice it, but

Photographic Hint.

The ordinary photographic plate, which is not color sensitive, is realis: blind to certain colors. These colors are reds, yellows and greens. The result is that all are rendered black in the print. Suppose one wanted to photograph a shawl with a design in black, red, yellow, and green. The erdinary plate would render these celors almost all the same. In the pieture it would be difficult to say where the red ended and the yellow began. But by using a color-sensitive plate and a color filter on the lens, the differences would be shown and the design would be clear.

Few Conquerers Died in Peace.

It is remarkable how few of the discoverers and conquerors of the New World died in peace. Columbus died of a broken heart; Balboa was dis gracefully beheaded; Cortes was dishonored; Sir Walter Raleigh was be headed; Pizarro was murdered; Ojeda died in poverty; Henry Hudson was left to the mercy of the Indians along the bay which he discovered.

### True Fortitude.

True fortitude I take to be the quiet possession of a man's self, and an undisturbed doing of his duty, whatever evil besets or danger lies in the way, -Locke.

### Out of Proportion.

Jud Tunkins says modern machinery has got to be such that a plain ordinary human being doesn't look much by comparison,-Washington Star.

## TWO KILLED, ONE DYING, BECAUS OF "HOARD OF GOLD"

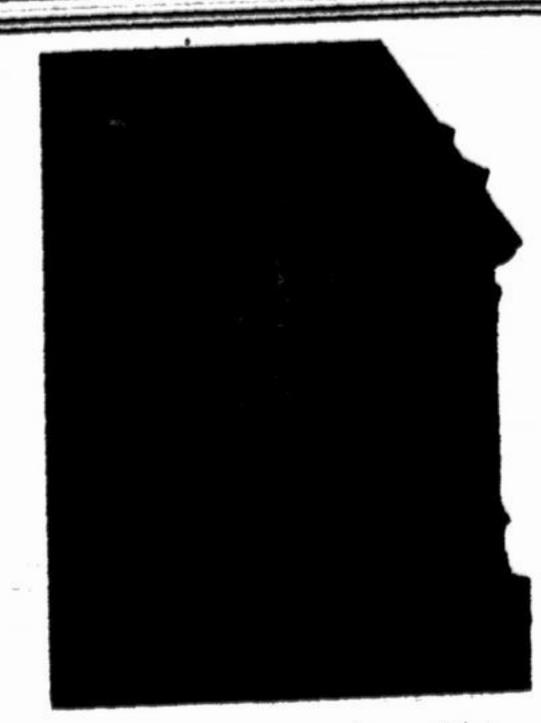

Perhaps you read in the paper of the murder of a brother and sister and the fatal injuries inflicted on another brother by an unknown criminal who had heard of their alleged "hoard of gold."

The victims, living on a farm in Wisconsin, were supposed to have money hidden away. The tragedy was the result. It is, unfortunately, but one of a large number of similar cases that are reported each year,
