Ed. Dunnagan of the Downers Grove Hardware Co. says he sells more fishing tackle in the village than he thought possible. He is of the opinion that nine-tenths of the people of this community go fishing. This is something remarkable for a town which has no lake or river within twenty miles worth a visit.

Mute testimony that the coal strike has been settled could be seen at the station Tuesday evening. Three solid train loads of coal went riding merrily over the "Q" to Chicago within an hour. It looked kinda good at that and reminded us that our winter supply had not yet been ordered, an oversight which didn't take long to remedy.

ARCADIAN PICNIC

Members of the Arcadian club, one of the oldest social organizations in the village, will get together Saturday afternoon at the home of their president, C. A. Carlson, in Carpenter st. for the final picnic of the season. Ladies of the club are busy with preparations for a delicious supper and members are asked to lay aside their regular Saturday afternoon duties and be at the Carlson home by 3 o'clock sharp.

America's First "Zoo"

Independence square in Philadelphia was the site of America's first zoological garden. It was there that Charles Wilson Peale, in 1791, transferred the museum which for a decade previous he had maintained in his home, Third and Lombard streets. The Philosophical society, at Sixth and Chestnut streets, gave him permission to use its building for his large collection of portraits of men of the Revolution. He started the zoological garden in the rear of the building. An eagle was among the living specimens. Above its cage was an inscription: "Feed me well and I will live a hundred years."

On an egg scale.

The Yellowstone remains the largest of our national parks and contains the greatest variety of scenic wonders. Everything within its more than 2,000,000 acres is on a gigantic scale. Distances are great; canyons are of terrifying depth; mountains tower to monstrous heights. The geysers, the "paint pots," the hot springs, are of never-ending interest to tourists.

Promote Prosperity.

"I have ever considered it as the indispensable duty of every member of society to promote, as far as in him lies, the prosperity of every individual, but more especially the community in which he belongs."—John Hancock.

Earth's Movement Fixed.

The lengths of the days and nights appear not to have varied appreciably since the earth took the present shape. A very slight change of rotation would produce grinding and fracturing in the rocks, and geologists find no trace of such action.

Thought for the Day.

The heart and life of a great triumphant emperor are, after all, but a meal for a little worm.—Montaigne.

Cucumber is a Fruit.

The cucumber is really a fruit, and not a vegetable.

REPUBLICAN RALLY

The first political rally of the fall campaign will be held Saturday, Sept. 9 at Roselle, the little village near the northern boundary of the county. It is sponsored by the Womens Republican club of that village. Mrs. Lottie Holman O'Neill will be the honored guest and there will be several prominent women speakers, including Mrs M. H. Lieber, of Winnetka. The affair will be an all-day one, held in a grove near the town with the Palatine Boys' band furnishing the music. The church women of Roselle will have charge of the refreshments and are preparing for a big attendance.
