Who Limited the Farm ?

CONCRETE is not a new material in the erection of farm buildings.

It is indispensable in construction of silos, watering troughs, fence posts, retaining walls, barns and houses.

But—there has been a limitation. Why not concrete walks for the farm. Never thought of it, huh? Well, its being done. Not just a single walk from hitching post to house but walks, approaches and drives—a yard complete.

No matter what you plan building this fall—we want to furnish the materials. Let us help you plan.

PAY-DAY OPTIMISM

Its great to be optimistic IF your aren't too optimistic on pay day. The trouble with most people is, that they imagine they OWN the world on pay day with the result that—twenty-four hours later —they OWE the world.

There is only a difference of one letter between OWN and OWE but OW! what a difference that is.
