

# HOME *and* Country

—Drawing by Jack Taner, Public Relations Department, O.A. College

The House That Health Built — a suggestion for a nutrition exhibit.

The house has whole wheat bread roofing, butter chimney bricks, oatmeal stucco walls, milk bottle porch columns, cheese door and door steps, a fish in the fanlight, lettuce window curtains, egg foundation stones, meat flag-stoned walk, graham cracker garage doors, beans and peas for gravelled driveway, with a celery tree and a wheelbarrow of fresh fruit and vegetables on the lawn.
