

St. Vincent local leaders, Mrs. Ivan Patterson and Miss Elsie Stewart with work by their members. In making the original design for the kitchen curtains one of the tools used was a plastic fly-swatter.

St. Vincent used a fly swatter to develop a background in a very interesting original design on curtains.

The majority of the members belonged to the sponsoring organization. Other artistic ladies joined the class along with sons, daughters and husbands. A five-year-old Hampton boy made a block with a rabbit design. He put his design on his handkerchief. He attended Summary Day with his mother, Mrs. Hudson Byers.

Mrs. Geo. Alderdice taught a group of public and high school boys during the Christmas holidays. They made blocks with their school crest and their name for shirts and book covers.

A Clavering 4-H Homemaking Club member made a design for the blouse and skirt she is making in the project "Separates for Summer".

The Chairmen for the two Summary Days were Mrs. Edward Urstadt and Mrs. W. Free.

Club members provided a very educational program. 27 ladies gave comments on club exhibits. They presented problems and reported successes and findings.

The chief problem was arranging a time for the meetings suitable for everyone, with poor weather and sickness interfering. Some had problems in securing paint and material for block. Because of these difficulties the Summary Day for Hanover was postponed until June to allow this group more time to complete the work.

At the Summary Day, six Women's Institute groups presented skits or demonstrations on different phases of block printing. Six other groups presented a story in the form of a song or reading. And some of the women's comments were: "It has been fun working together." "I found block printing relaxing." "Block printing meets a need to create." "I wouldn't miss a Summary Day. We learn so much from what others have done."

Block - printing exhibits from Kiowana and Goring Institutes. Standing are the local leaders, Mrs. J. Sparling and Mrs. Bert McKay.
