The New Morality

"Don't get the idea that such things as chastity, loyalty and responsibility are outdated," warned the speaker. "Don't get the idea that immorality is a big part of university life, or that there's anything romantic or glamorous about it. It needn't affect you if you make your friends among young people whose interests are more like your own."

Protest and Progress

"Young people have always protested and many good reforms have come from their protests. But protest is not violence, destroying property and fighting anyone who tries to stop them, claiming to be against violence but themselves using any violence they can lay their hands on no matter who gets hurt."

The World You Make For Yourself

"So much for the world you have inherited. There's another more personal world that you make for yourself, your career, or the work by which you earn your living."

Your Career

"Your career will depend on your abilities, but perhaps almost as much on your education. No generation has ever had the opportunities for education that you have — the danger is that you may quit too soon."

Miss Chapman told the following story. "When Ibsen was asked by a young man what he should do to be the most use in the world the poet said, 'There is no way you can benefit society more at this time of your life than by coining the metal you have in yourself.'

Mr. Nelson Hawn instructing the girls in public speaking.

"Coining the metal you have in yourself," repeated Miss Chapman, and went on to explain this statement. "You are young with dreams of doing great things and certain abilities but your abilities are mixed up with lack of knowledge and no discipline in the use of them, like bits of silver in a lump of ore. There is no way of using the ore until it has gone through the furnace and the silver has been melted out and minted into coins. In the same way education will bring out your abilities and polish them so that you can use them to the fullest extent."
