

in increased beauty to the interior of St. George's Church. A new ceiling of sheet styrofoam strapped with dark lath was installed to cover the old green tin ceiling and prevent extensive heat loss. New lighting in the chancel and an eternal flame lamp were also installed.

On January 1st, 1974 the Rev. Glenn A. Sim came to Apsley to begin, we hope, a long and happy incumbency. Already he has encouraged us by approving renovations to the church with addition to each side of the chancel, the basement exit-entry, a new rear door in the church and the floor completely carpeted.

This is not the end but the hopeful beginning of a full history of St. George's for we intend with God's help to continue in his service for many years to come.
