

### The Blue Springs

One beauty spot which will always be associated with Maple Hill and can hurl defiance at the dictates of changing conditions, is the copious spring of material water call the Blue Springs. The basin of this spring is eighty-eight by forty-five feet and forty-five deep or more. The lovely spring is blue in color, clear, sparkling and pungent to the taste, and from it cascaded a swift narrow stream, very cold and very clear, which flows into the Saugeen River a short distance away.
