A JUNIOR GARDEN

Every year, around the end of May,  
Many children go out of their way,  
To plant a junior horticultural garden  
For something to do in the holiday.

First they have to buy the seeds,  
Which is truly one of their greatest needs.  
They dig their plots and plant the seeds,  
Then keep it watered and free from weeds.

Later on in the middle of August,  
Thinning and weeding are truly a must.  
For when the judge comes to look at your garden,  
They'll be assured of an A or B plus.
