

- i) Across from the Palace Hotel on Mill Street
- ii) Behind the Commercial Hotel
- iii) Opposite the "T" intersection of Mill Street and Parallel Street

Parks (i) and (iii) require the backfilling of the river-bank which is needed to protect the existing road structure. By extending the banks by a small amount it will provide a small "sit down and enjoy the scenery" type park.

Each of the three parks will have benches, refuse containers and ornate lighting. Negotiations will be required for the park behind the Commercial Hotel.

- . Within all of Phase I, we will replace and add to existing street lighting with ornate lighting including the bridge on Concession Street.
- . Benches will be added where space permits along with refuse containers.
- . Over head wiring should be buried or rerouted off these streets or placed on one side of these streets in order to allow for tree planting and growth along the streets.
- . Establish a municipal parking lot within the core.
- . Provide incentives to businesses and homes to renovate, and/or repair their buildings or build appropriate street facades to fit the era of early 1900's
- . Install ornate sidewalks with appropriate handicap accesses at corners and crossings.
- . Place flower planters along streets.
