Crestwood Visitors Find Fog, Volcano, Own Car

Fog, 1,500 people and the family car of Mr. and Mrs. Don Sharpe of Warsaw—

They all showed up Wednesday for Crestwood Secondary School's first open house.

The thick fog failed to keep people away and when Mrs. Sharpe wandered into the school's auto mechanics shop she was surprised to find her car had become part of the demonstration.

The class wanted a car to put up on the hoist for a grease job so Jim Sharpe went out on the street, found his mother's car and drove it into the shop.

There were gymnastic and folk-dancing displays, an exhibition basketball game, demonstrations of cooking, drafting, hairdressing, electricity, machine work, text books and teaching methods.

The geography club built its own working models of a volcano and a geyser and the history club had a display of historical newspapers and maps.

On top of it all was a posture contest to follow the school's posture week.

"The whole thing was completely satisfactory," said principal W. W. Watt. "It couldn't

have been better. "We printed 1,500 programs and everyone was gone and students worked hard to a fine demonstration."

The school, which accommodates nearly 800 students only opened a few months. It is classed as one of the up-to-date institutions of the province.

Crowned Posture Queen was Grade 9 student Linda Jopling. Second was Cathy Jopling, Grade 10, and third was Rosebush, Grade 11.
