

III Digger in motion on a down-hill slope. Dirt being piled to left of ditch by a conveyor belt. The dirt is dug from ditch by buckets on big wheels is dropped onto belt as they turn a complete circle in operation.

IV The digger continues to move eastwards. Huge trucks brought the lengths of pipe from Brighton to the right of way 8-10 lengths at a time. The sections of pipe each weighing 1 ton or more, were lifted clear of the truck by a crane, held aloft, while the truck drove out from underneath, and waited ahead while the crane moved to unload next piece until truck was unloaded.
