

Just a few hours a month can provide you with limitless opportunities...

Imagine a Women's organization whose concept and growth is based on fulfilling its members' needs.

Education is a part of our organization, as well as family and community concerns and issues. As with many "new ideas", we were born from tragedy - the death of a child, due to lack of knowledge about food safety. In 1897 the first W. I. was formed, and the determination of those early members was rewarded when the pasteurization of milk became a reality.

Thus our reputation and reliability began to expand. As we spread across Canada and around the world, the diversity of our membership assured us an unprejudiced view of society and its needs.

Our voice is respected and listened to by Governments and other organizations who work for change.

On a more personal level, our most valued asset has proven to be fellowship.

We won't ask you to change the world - or yourself. We'd like you to come and experience the supportive family atmosphere shared by nine million women around the world.

The rest is up to you.

The Women's Institute is a unique group, where you can have as much or as little as you want of what we have to offer. Our responsibility is to provide you with the opportunity.

Come and visit us.

*We'll show you how big
your return can be
when you invest in
yourself!*
