

The parties given the soldiers when they returned were great events, as whole families were represented. These were preceded by a banquet, tendered the boys.

Kearney is very proud of the part her sons played in both World Wars. We believe we are the only town to have all the boys who went over in the Second World War, return home safely. For this we are very grateful.

Kearney has not been without its champion baseball, hockey, and football teams. During the days of the indoor rink there was a very active curling club. During the winter season a carnival was held. These proved very successful, and many people showed great artistic ability in dress designing.

With the exception of the flu epidemic of 1918 which was nation wide, Kearney has been a very healthful town. The Drs. who have helped to keep it such are, Drs Hogg, Paulin, Mason, McMurphy, Graham, & Pocock.
