

brought all up to date on the workings of the Hatchery & of lakes that are stocked with fish from the Hatchery.

Among interesting pictures in the visitor's entrance, is one of Mr. Harry Hill and his family, the original settlers in that area. Hill's Lake was named after the Hill family and it is still known by that name.

After a guided tour of the many ~~points~~ points of interest, Peri fed some larger fish in a holding tank outdoors with the fish putting on a lively show as they were fed.

Plans were discussed about refreshments to serve ~~at~~ at the Savard School Re-Union.
