

Re. medical supplies in camp:-

Irene Empey informed us that Mr. Wright had been approached about Mrs. Walker having supplies in camp. Mr. Wright promised he'd look into the matter. No further word has been received.

It was moved by June Joye that we have Mrs. Walker approach the doctors in Cochrane for a letter of recommendation and a list of medicines or drugs that she could have here and administer. Seconded by Jean Atkinson. Carried.

All members agreed that J. Joye's suggestion that Mrs. Walker have a first aid kit in her home, was a good idea.

↓ Doreen Beck reported to the members about her trip to the Convention.

↓ I. Empey read a story about the history of our "Cred." J. Joye asked the secretary to send for the "Felt Study Kit."

J. Joye read a very interesting and informative paper, "Latest Medicines", concerning the dangers of Carbon Tetrachloride.

↓ The contest: "Shamrock" was won by Irene Empey. Members helped sew the quilt. The meeting closed with ideas on "How to help keep you on a diet".
