BURGESSVILLE—Honey harvests begin next week in Oxford County.  
 Apiculturist Bill (Billy Bee) van Blyderveen of the Old Skep

Honey House at RR 1, Burgessville is leaving Monday for his apiaries in Cochrane where he will extract the clover honey from the 160 hives.

The Cochrane apiaries are an experiment which has proved successful, van Blyderveen says.

He has been harvesting Northern Ontario honey for four seasons and says people prefer its clear golden color and milder taste.

In fact he is going to move the remaining 140 hives he now has in seven apiaries near Burgessville up north next year.

"The farmers are cutting their hay really early now and there's no flowers."

And while bees are essential to apple orchards, orchards are the death of bees, he says.

"The insecticides use in spraying the trees after pollination also lands on the clover killing the bees."

With the wave of organic food enthusiasts and the interest in nutrition a lucrative market has been created for nature-loving entrepreneurs.

In Holland, honey was merely a hobby says Metje, Mrs. van Blyderveen. Since their move to Canada in 1961 honey has

distinctly different. Light colored honeys such as clover and apple blossom are mild tasting, whereas tulip, poplar and sumac are strong in flavor.
