

### Moldy hay destroyed

Don Riddell, who farms 146 acres just north of Wellburn, got even hotter in the 90 degree weather Thursday afternoon as he burned nine acres of spoiled hay. Mr. Riddell said, "I've never seen

such a bad year to get hay in." The hot, humid weather and frequent rains have destroyed many hay crops. "Hay doesn't cure in this weather; it just sits in the field and goes moldy and rotten."

## Lakeside Bible Society Names Officers For '72

The Canadian Bible Society has one task, that of providing Bibles, Testaments, Gospels and Scripture selections for Canada and some 150 other countries. To meet the needs, scriptures must be published in 1400 languages and published in forms which meet the needs of a great variety of people. English is the mother tongue of only nine per cent of the people of the world. The translations must be provided free or at below cost price which people can afford to pay. In the accomplishment of this great work, the Can. Bible Society is one of the most significant missionary and evangelistic movements in the world.

The meeting was open to the community and all were interested in Mr. Patience's talk on Regional Government. At the close of the meeting, the committee served lunch and a social time was spent.
