

Village Histories cont'd.

1984: These pictures looking north-east from the corner of George and Cambridge Streets show where work was carried on from the area in the centre of the previous picture. The Sukstorf buildings show to the left of picture 2. The mouth of the Willow Creek shows on the right of Picture 1. The "walk" on the top of the dike was completed from the Ross Street Bridge also.

This Bridge on Orchard Street shows what happened where the Willow Creek used to flow. The banks were all levelled and graded and seeded.
