McDONALD & EVANS.

VICTORIOUS KIMBERLEY!

The Farmers' Institute, Baseball, Football, all Favor Kimberley.

Kimberley thoroughly enjoyed itself on Thursday of last week, when a large number of people congregated there to attend the meeting of Centre Grey Farmers' Institute, to witness games of football, baseball, and hear speeches. The speakers advertised to be present were Dr. Sproule, M. P.; A. J. McMillen, Manitoba emigration agent; and R. W. Phipps, Esq., forestry commissioner. The two latter gentlemen, however, did not put in an appearance.

About 10 o'clock a. m., people began to arrive in the lively little burg of Kimberley, and by noon a respectable gathering of farmers was present to do justice to ample hampers in Mr. Stewart's beautiful little grove, where seats and tables had been provided and a magnificent swing erected.

After dinner the president, Mr. T. Kells, took the chair, and speakers were called and delivered addresses in the following order: Mr. Thos. B. White, of Collingwood township; Mr. Thorpe Wright, Mr. D. Ellis, Dr. Sproule, M. Hammond, Esq., and M. Richardson, Esq. The speakers were all attentively listened to by an orderly audience, and Dr. Sproule, as the only advertised speaker present, delivered an eloquent and thoughtful address upon questions pertaining to the interests of farmers. He dealt a hard blow at the bachelors who, he held, were of little use in this world, and it is safe to hazard a guess that some of the genus homo bachelor present felt that it would be the part of wisdom to do something for their country pretty soon or lose all respect for themselves.

The speaking was interspersed with most excellent music by the Flesherton brass band, who, considering the small amount of practice which they have had, did remarkably well. Their music was highly appreciated by the good people of Kimberley, and the band was kindly pressed to renew the visit.

After the speaking had ceased, and votes of thanks passed to the speakers, chairman, band, the kindly disposed ladies who had provided the magnificent spread, and the people of Kimberley in general for their interest and assistance in making the meeting a success, everybody adjourned to the ball grounds, where a game took place between the Duncan and Kimberley baseball teams, the latter coming out victorious by 23 runs and an innings to spare. Then a football match was played between the Duncan and Kimberley teams, Kimberley also coming out victorious by one to nothing. In the morning a baseball match between Vandeleur and Kimberley juniors resulted in a victory for Kimberley by a score of 52 to 16. Three victories in one day caused great jubilation among the winners, and made it, altogether, one of the greatest days for enjoyment which Kimberley has seen in some time. The natives thoroughly appreciated the advent of their visitors, some of whom had come long distances, and the latter were naturally charmed with the reception tendered them in the picturesque little village of Kimberley. The directorate deserve to be congratulated upon the success of their meeting, and the President and secretary highly praised for the time and expense which they devoted towards the same end. Long may the Institute flourish in the good work which it has taken in hand.

Our Scrap Book.

A young man of Thornbury caught a speckled trout weighing three pounds and measuring 22 inches.

Probably the oldest couple in Ontario is Austin Rogers and wife, of Cape Vincent. Mr. Rogers is in his 91st, and Mrs. Rogers in her 93rd year.

Garry McNaughton, a young man of about 19, whilst bathing in the lake near

Singhampton on Sunday afternoon last about 2 o'clock, was accidentally drowned.

One seventh of the coal mined is lost from being broken up too finely to be burned with profit; a prominent railroad company is now mixing the dust with pitch, and compressing it into blocks that burn like hard coal, with the advantage that they are entirely consumed to ashes.

Mr. Robt. Hawkes, of Chandos, discovered a curious freak of nature in a nest of young robins, one of the nestlings being pure white in color. The eggs were in no way different from other robin eggs and the young ones presented all the other appearances of a robin. The curiosity was watched carefully until fully feathered and after leaving the nest was captured and caged, but unfortunately it died. The wings were preserved.

A fad in writing paper is what is called lovers' stationery. It is fine note paper delicately tinted, the most fashionable shade being light pink. The water mark, to be detected by holding it up to the light, is a blending of two hearts pierced by an arrow. In the lower corner of each fourth page (or reverse of each second half sheet) appears what at first sight looks like a blemish. But this is the charming feature of the novelty; it is the kissing spot, for here the correspondent presses his or her lips.

Magistrate McKinnon exhibited something novel in the shape of a petrified ground-hog to an Advertiser reporter at his residence on Wellington street last Saturday afternoon. The curious find was made on Mr. McKinnon's farm, east half lot 11, 5th line, Caledon. The animal is almost perfect in shape, its legs alone are missing, and rests upon a large stone. It is regarded as quite a curiosity by all who have seen it.—Orangeville Advertiser.

Advice to Mothers.—Are you disturbed at night and broken of your rest by a sick child suffering and crying with pain of Cutting Teeth? It so send at once and get a bottle of "Mrs. Winslow's Soothing Syrup for Children Teething." Its value is incalculable. It will relieve the poor little sufferer immediately. Depend upon it, mothers; there is no mistake about it. It cures Dysentery and Diarrhoea, regulates the Stomach and Bowels, cures Wind Colic, softens the Gums, reduces inflammation, and gives tone and energy to the whole system. "Mrs. Winslow's Soothing Syrup" for children teething is pleasant to the taste and is the prescription of one of the oldest and best female physicians and nurses in the United States, and is for sale by all druggists throughout the world. Price twenty-five cents a bottle. Be sure and ask for "Mrs. Winslow's Syrup," and take no other kind.

The entire island of Anticosti, at the mouth of the St. Lawrence River, comprising some 2,500,000 acres, will be sold at public auction in London July 3. So large a portion of the earth's surface is not often offered for sale at one time by private corporation. Its present owners have grown tired of the effort to make their investment profitable, although, according to their own statements, the island has not been thoroughly explored, and they propose to give the chance of making something out of it to their successors in possession. The fisheries in its vicinity are of historical, if not of present value, while the island is thought to contain, besides lumber, minerals of various descriptions and petroleum.

THEY WANT TO BE ELEVATED.

There appears to be a craze for high towers in both Europe and America. London, Eng., is to have a tower which will surpass in height the Eiffel in Paris. The Tower Company offered a large prize for designs and over seventy architects competed, many of which show great ingenuity and skill, and the heights range from 1,200 to 1,500 feet. The plans will be laid before a committee of experts and as soon as a selection is made the work of construction will be commenced. Chicago is also going to build an immense tower and will have it ready for the opening of the World's Fair. So far Canada has not shown a disposition to follow suit, but it is not improbable Toronto may soon boast of a tower.—Nation.

WHITE AND DEAF.

Mr. Harrison Weir, president of the National Cat Club, England, says in his book, "Our Cats," that a white cat of long or the short-haired breed is likely to

be deaf. Should it have blue eyes, the fancy color, it is almost certain to be deaf.

Mr. Weir, at a cat-show, purchased a white cat, a beauty, loving and gentle, for the low price of two guineas. When he got it home, the cat proved to be "stone deaf."

Then the trouble began. If shut out of the dining-room, its cry for admission could be heard all over the house, for, being deaf, it did not know the noise it made, though its owner often wished that it could hear its own cry. When it called out as it sat on his lap, it called with *ten-cat power*, and its commanding voice caused it to be named the "Colonel."

One day a friend saw the "beauty," and admired it so much as to accept it as a gift, even after being told that it was "stone deaf." A few days after Mr. Weir received a letter from the friend, offering to return the loud-voiced cat.

"Give it to any one you please, but don't return it to us," was the reply.

The "Colonel" was given to a deaf old lady, and both were happy.
