Proton Station.

From our own Correspondent.

Well, Mr. Editor, it is now some time since you have heard from us. Perhaps some of your readers were under the impression that we were dead and gone to the happy hunting grounds. Not so, however, as we are still subjected to the trials that are in connection with having a cross wife. I trust our negligence will be overlooked under such trying circumstances as ours. The laws of gravitation must have undergone a change or this orb of ours must have gained time somehow in its revolutions or we would not have had such a magnificent spring. The farmers around Proton seem to be in the second heaven of bliss over it.

Mr. Thos. McQuay had a serious loss the other day by getting two of his horses killed by the C. P. R. But as he has 7 left and horse flesh so cheap perhaps he was not such a loser.
