W. H. THURSTON EDITOR

THE COAL QUESTION

The coal question is one of vast interest to the village public just now. In order that all may know just how things are working out in sister towns we might state that Walkerton will get its coal at $16 for authracite nut and stove coal. A Meaford dealer advertises it at $15.50 cash and says several cars will be to hand at once and arrive continually during the winter. The provincial Fuel Controller has notified the mayors of towns that not more than a month's supply of coal can be supplied any one person at a time. Such a ruling would not work out here, as the car loads have to be distributed when they come, our dealers refusing to stock it. Coal should be sold here at not more than $16 per ton.

AN UNGUARDED ADMISSION

In speaking before the Provincial Hydro Electric Commission on Friday last Sir Adam Beck made the statement that "Well constructed plants like Hydro's will last 100 years." Yet he adds ten per cent. to our bills on this system every year, thus forcing us to build a new plant every ten years! The two things are irreconcilable. Probably the above admission was made in an unguarded moment. If it be correct where does our ten per cent. go to?

The garment that covers the most territory on the lake shore is a coat of tan.

East Grey Fair Prize Awards

HORSES
