TO EIGHT MILLION

Canadian men and women have 8,000,000 deposit accounts in the chartered banks—equal to one account for every adult.

Banks value each depositor's business highly . . . safeguarding your money, paying interest on your savings, standing ready to repay . . . striving to retain your confidence and friendship.

Your bank manager appreciates his obligation to you. Ask him what is a banker's first concern. He will answer, "Safeguarding the depositors' funds."

For he realizes that depositors are the very foundation of the efficient credit process by which banks mobilize deposits to serve the needs of this working, growing, enterprising Canada.

●●● *If all the people who work for the telephone company,*

And all the people who earn a living by making the things the telephone company needs,

And all the people who have their savings invested in the telephone company,

And all the people who depend on good telephone service to run their businesses and manage their homes;

If all these people, with their families, lived in one city,

This City-With-No-Name would be by far the largest in Canada, and one of the largest in the world.

Keeping pace with the growing needs of communities everywhere for more and better telephone service has taken lots of work and lots of money.

Only a financially healthy telephone company can carry on this big job.

Telephone users, employees, shareholders — everyone has a vital interest in a service that means so much to the welfare of so many people.
