He was the only son of the younger son of an old Yorkshire family; he had taken high mathematical honours at Cambridge; he was a Fellow of St. Kenneth's; he was without near relations; he had no profession, but lived on his Fellowship, and, without sacriticing any pleasures that were open to him, had, with an enduring enthusiasm, adopted scientific investigation and discovery for a career. He held himself as much a ove and beyond marriage as science is above the brewing of small beer. He had come to Combe Bassett on a visit to his father's old friend, Dick Derwent, for the rake of the coverts; and, so far as the coverts wer the whole history, as completely told as any

Rupert left the cottage just in time to reach the Hall (as his host's place was copularly called) before dinner. He met nobody the way but an old woman in a blue cloak, of whom he took no special heed-for what were all outward things to a man who loved, and before whom the future was opening out in rainbow colours? Even the mysters of his love story gave it additional charm t him, whose imagination, chronically kept in the grooves of hard study, needed now and then to take a flight into the open

There were not many guests at the Hall Dick Derwent was a bachelor of five-and orty, who did not care to fill his house for the sake of having it full. The few who were there were men who were waiting for the frost to break, and with whom Rupertengaged as he was with his own affairs-had but little sympathy. He liked Dick, who was the best of good fellows, and had shown him much kindness; but he did not like Dick's friends, And even to Dick, good fellow as he was, he had never breathed a word of his love-story. There were many reasons for silence, of which each was allsufficient for him. In the first place-unti to-day-marriage had, from his point of view, been simply impossible. He had been merely drifting, and hardly bared to open gain, how could he bear to tell such a story to open-hearted and free-tongue Dick, who had never kept a secret in his ite, and would be surn to make Bertha and Rupert's love for her a matter of rough want of better sport, ride out and draw the cottage with "Yoicks" and "Talleyho And who was Bertha's father, and what
