PROVIDENCE BAY.

To the Editor of the STANDARD.

SIR,-Notwithstanding the anticipation of a light crop after a cold, late spring the farmers of Manitoulin Island are rejoicing over an abundant harvest, it being the finest ever the Island produced. The fruit crop is of little note here yet as it is only newly settled, but doubtless it will be a good fruit | Peas, 74c to 76c; Hogs, \$9.00 to \$9.50; Potagrowing section judging from the flourishing toes, per bag. 75c to 80c; Butter, dairy, i9c condition presented by young orchards. to 20c; eggs, 20c to 21c. There has been little or no fruit this season it seems a favored spot in that respect. The rapidity of vegetation is unrivalled; it is astonishing to see the extraordinary growth during this summer.

The healthfulness of the climate is enticing many to its insular shores who desire to live in the fulfness of that blessing, and who receive it to their full expectation. Many persons are also so fascinated by the salubrity of the climate its beautiful scenery and its growing importance, that they are choosing it for their homes. Is the land all taken up? This is a question frequently asked and generally answered in the affirmative, The land is mostly taken up, especially in the townships surrounding Providence Bay, which are admitted to form the choicest Pears, Wm. Mitchell, Wm. Ward. Grapes. J. Thompson. 6 Carrots, Table, J. farming land on the Manitoulin. The beautiful lake Mindumor, a short distance from the village of Providence Bay, is surrounded by a portion of land seldom equalled in Ontario for beauty of position, fertility of soil, and good timbered woodlands. The soil is generally of choice clay land, but there are some farms of light sandy loam. Although the land is generally taken up, yet there are those who bought several hundreds of acres, and not being able to conveniently occupy the whole and having taxes to pay, would dispose of it at a reasonable or cheap rate; for this reason persons coming in to buy and settle would get a home without much

There are many lines of employment or business which this part of the island as yet stands in need of, and which could be commenced and carried on with good profit roll butter, 1 coppy of the Flesherton Among those blacksmithing might be especially mentiond. Two well settled townships, namely, Carnarvon in which Providence Bay is situated, and the adjoining one, Embracing the Lives and Wonderful Adven-1 Set team harness, C. C. James. Campbell, are without a blacksmith. There is a good opening for a man of that class, as \$700 was made in a few months last year by one mau. Any person who would come

along would be welcomed by the farmers. The 'ate disaster, the loss of the steamer Loaves home made bread, H. King, Asia, has cast quite a gloom over this neigh-

A REPLY TO "BATEPAYER."

To the Editor of the STANDARD. SIR,-As a reader of the STANDARD I wish to say something in reply to "Ratepayer." In the first place what is the object of the holidays? Is it not to the worn out teacher a means of recuperating the mind and body? "Ratepayer" appears to be one who thinks the more assiduously the mind is kept at work the more progress is made. In this he makes an error. Who should determine the length of the holidays, "Ratepayer" or our legislators? Again, is "Ratepayer" compelled to work when sick? No. But evidently he would make the teacher do so, possibly because he thinks the teacher the servant of all and not entitled to legal privileges with other citizens. Now, sir, I hope that when
