WHAT IS CATARRH?

Catarrh is a mucopurulent discharge caused by the presence and development of the vegetable parasite amoeba in the internal lining membrane of the nose. This parasite is only developed under favorable circumstances, and these are: morbid state of the blood, as the blighted corpuscle of tubercle, the germ poison of syphilis, mercury, toxemia, from retention of the effluvia of the skin, suppressed perspiration, badly ventilated sleeping apartments, and other poisons that are germinated in the blood. These poisons keep the internal lining membrane of the nose in a constant state of irritation, ever ready for the deposit of the seeds of these germs, which spread up the nostrils and down the fauces or back part of the mouth causing ulceration of the throat; up the eustachian tubes, causing deafness; burrowing in the vocal cords, causing hoarseness, tearing the proper structure of the larynx, the bronchial tubes ending in pulmonary consumption and death.

To effect a cure the parasite must be removed or destroyed, hence inhalants and snuffs are worthless. Some time since a well known physician of 40 years standing, after much experimenting, succeeded in discovering the necessary combination of ingredients, which never fails in absolutely and permanently eradicating this horrible disease, whether standing for one year or forty years. Sufferers should, without delay, communicate with the business manager, Mr. A. H. Dixon, 307 King St. West, Toronto, and get treatise free by enclosing stamp. Ask your druggist for it.
