

The Standard.

MARKDALE MAR. 13, 1884.

-The practical work of Methodist Union goes smoothly on, and the prosnects are that the final consummation will take place next June without any serious difficulty. The fearful ones, who so much admired the "principle" but who so much trembled at the many lions in the way of the plans submitted, are likely to be dissapointed,—happily or otherwise as the case may be. The legal difficulties are now being overcome by special Acts being passed both at Ottawa and Toronto. legalizing the titles of all church property in the new united church. Some oppositionists have been trying to make their influence felt in regard to the Bill at Ottawa, but they are evidently too weak in numbers to accomplish much. - Truth.

-There are a good many people in this country who take pessimistic change. Grey Co. has already exviews of the future of the Canadian Confederation. Most of these people have regarded the secession resolutions introduced at the farmers' convention at Winnipeg the other day as an indication of the speedy dissolution of the Confederation. The News pointed out the fact that the towns and cities would be almost unanimous in supporting the Dominion, even if the farmers did rebel. This statement has been borne out by a mass meeting of Winnipegers which was held Saturday night, when the secession resolutions were unanimously denounced. Some people seem to forget that Winnipeg is just as much of a Canadian city as Montreal or Toronto. Saturday night's meeting showed that it is just as loyal to Canada.-Toronto News.

BETTER TIMES AHEAD.

farmers in the direction of having cheese factories established in various neighborhoods through the county, and too much encouragement cannot be given in that direction. If we take the experience of districts where factories have been established for a number of years, it cannot but give enthusiasm to those interested in this county. There are districts in the older settled portions of Ontario where the majority of farms were heavily mortgaged, before the introduction of sume it runs in the blood. cheese and butter factories, and very few years had elapsed after the attention of farmers had been directed to stock raising and dairying, until the mortgages were paid off, and agriculturists were comfortable with a balance to their credit. In fact many have become wealthy. The advantages | week. are many: The expense is materially decreased, farm work is divided over the year more evenly, the fertility of the soil is much improved, and weeds and thistles more effectually exterminated. Our farmers are becoming this respect, and we have no doubt the office staff, Markdale. change for the better in the near future will be even greater than even our most sanguine expectations.

GOVERNMENT ECONOMY.

That there is a superabundance of town. representatives in our County Councils. as well as in the Local and Dominion Parliaments, none will question, but how to remedy the telt evil is a question surrounded with difficulties. We believe, however, the time is not far distant when a reduction will be made in the representation throughout. Mr. Drury, member for Fast Simcoe, last week moved a resolution for a committee to consider the desirability of so amending the Municipal Act that the number of members in county councils may be reduced, and to collect evidence on the subject. He does not contemplate action being taken secretion.

this year, but very properly appreciates the growing agitation in some counties where the county councils have proved to be unnecessarily large and expensive. The Committee's labors will no doubt serve to enlighten the public as to what means can be taken to reduce the expensiveness of Pills. such councils, and will doubtless result in material modifications in their constitution.

This is the commencement of a much needed reform which will, we hope, before many years, reduce the number of representatives one-half in ing tonic a remedy worth trying. each of the three parliaments, Connty, Provincial and Dominion. probabilities are that there will be an Act passed the present session of the Dominion Parliament extending the franchise to the female sex, or those of them who have the property qualisex to a vote. This will largely inmultiply the representatives in the various legislative departments very materially; be this as it may, there is room for improvement, and we believe public opinion is ripe for such a reform, and doubtless other counties which have not yet tested the question will be found strongly in favor of reducing the number of their representatives, What say the press? We would like to hear.
