New Improvements.

The present age is full of inventions; some of them wise, and otherwise; but the other day we devoted parties to anthorize any one whom they ally the latter. Indeed the noise was a spare hour in "Milling," which our enterprising friend, Ford, has introduced. The process by which flour is manufactured, is not only a novelty. but solves a chemical problam which has long held a discussion in speaks of me flying off at a tangent! Well, ur editoria draid.

Under the old process of "Mashing" grain, previous to seperation (bran from kernel) a c rtain amount of in jurious fermemation took place, during this process. At this particular, But I think I am perfectly safe in saying that one a soldier was praying tervently he has not been in the school to take any and just as he was expatiating ou the vileness and misery of his hearers an enthusiastic fellow soldier shouted for want of practice. However I am glad to truly startling, and as if the fact of our being sinners was a most delightful piece of news. It forcibly reminded me of a somewhat similar incident tuat took place at a prayermeeting not not a thousand miles from Lyons Head. Attending the meeting was a very earnest old brother who was also very deaf: But the fact that he didn't hear everything, in no wise restricted the number and fervency of his responses. On one occasion some one in praying quoted the text "The divel as a roaring hon goeth about tor to the second story, where it about the wonderful country called "Lyon's seeking whom he may devour" when worshippers by a fervent "Glory be to his holy name."
