There are two chief doctors and four subordinates, who serve in turns. There are besides two spothecaries, ten Augustinian Sisters, and a large force of laborers. All of these people, except the two chiefs, will be obliged to remain in the hospital constantly until November, having been forbidden to go out into the city. One Sister has already died here.

The treatment both here and at Toulon, in the first stages, is twenty drops of laudanum, with three grains of ether, and ice in the mouth to stop the vomiting. In the second stage the patients become very cold. From ten to fifteen grammes of acetate ammonia, the same quantity of alcohol, and The two injections of morphia are given daily. AT TOULON.

My visit to Toulon was necessary in order to show me more plainly what were the effects of the epidemic. The country people change, and no postponement in any way seemed to have lost their wits. The stations everything will be carried out exactly as stated. along the road have been deserted save by the railway officials. As at Aries and every where else where there was a stopping | Bible? place, piles of baggage, bedding, and household furniture encumbered the platforms. whole earth? At the Boulevard de Lesse, near the station at Tou oa, I saw no human being save one cabman, who was sound as lesp beneath the shadow of a huge umbrells. I awakened him and hired him. I started at once for an in- to TRUTH. And aside from the rewards, themspection of the town. Not until I had reached the Place d'Armes did I see a soul. | TRUTH is full and big value for the money. The Place d'Armes is the usual resort and Bearin mind that you pay nothing extra for the lounging place of many sailors, for Toulon is privilege of competing for these ceetly rewards, a huge marine barracks, where at times any case for your one dollar, which is the discern but slight changes. In the there are as many as 12,000 sailors. Now I regular subscription price, and will also get who in previous competitions wen prizes exprepared as follows: St. Ferreol, a broad and prominent the morning before stin the main part of the town, only the morning before stin the main part of the town, only the morning before stin the main part of the town, only the stin the with the soldiers, have been sent away, and are now quartered on the high ground which surrounds the port. Still two thirds of the men I came across were either soldiers or sailors. The surgeons in the service and the Sous-Prefet estimate the people in the town to be to-day about 25,000.

. If, in a sanitary sense, the condition of Marseilles was frightful, that of Toulon struck me as simply mur lerous. Toulon has always been a breeding place of disease. Smallpox when it broke out in Toulon was always of a malignant type, and more diffi. cult to stamp out than elsewhere. The natural death rate is invariably high, and likely to be increased at any time by abnormal diseases.

Toulon streets and shops displayed no thing of their former buscle and activity. There were some few signs of life only in the two streets of La Republique and La Fayette. Here the shops were open, but elsewhere they were closed. No business seemed to be the rule, and a vitlt paid to the outlying sections of Toulon showed how the dreaded disease had made the streets a solitude I visited a hospital in the suburbs constructed in that unfortunate way so much in vogue a century or more ago. It has been receiving cholera patients since the 14th of July. I saw there thirty-six cases of cholera. Here I saw Mme. Dorvan, a lady of wealth whose name has already been celebrated for her devotion to the cause of humanity. This brave woman has nursed cholera patients in Egypt, Greece, and Italy. I found her in this hospital busily occupied, moving from bed to bed, administering to the wants of the sick. In a conversation with her in regard to the contagious character of cholera, Mme. Dorvan agreed with the doctors that under proper precautions the elements of danger were singularly lessened. I noticed that the doctors smoked cigars and chewed considerable quantities of

I found no one who could give me any intelligible account of affairs. He said Arles was deserted and so panicstricken that the dead in some cases remain-
