A Chinaman's Strange Attachment.

In Alaska street, on the corner of a narrow alley below Sixth, there is a dingy laundry, with the name of "Wah Kee" painted in flaming letters on a crazy sign atove the door. This is where Wah Kee lives and works and spends his lonely life.

The house across the alley is just as old. and the roof is just as crazy, and the folks to have a solid crust. But our moon being a that live there are just as poor and lonely as poor Wah.

That's where Tot lived. Everybody knew Tot. Tot's clothes were old, and Tot's face was wan, but acmenow the soul of the little one crept into the heart of the lonely Chinaman, and Wah Kee's eyes beamed as they never beamed before.

So he would stand by the door and look across the alley at Tot and smile-and Tot would patter across the little ocean of dirt and water, and clasping her chubby hand around Wah Kee's legs, look up in his face and coo.

Tot's fo ka chided the little onc-for they hated the sight of "the haythen," as they called Tot's friend.

One day Tot stayed away and Wah Kee looked in vain for the baby. Another day passed and then Wah Kee's face grew sad and his heart heavy, and he shambled across the narrow alley and begged Tot's folks to tell him where Tot was.

A NARROW ESCAPE.

The Struggle Between a Man and a Pan-

A Bombay shikaree narrates how he once actually fell into the claws of a panther, and lived to tell the tale. After describing the incidents of the hunt up to the time when the beast broke cover, he says:

"I had to wait until the panther was within a few feet of me, and then I put my rifle down to his head, expecting to roll him over like a rabbit (as I had succeeded in doing on other occasions), and then place my second bullet pretty much where I pleased. To my horror, there was no report when the hammer fell. The next mcment the panther, with an angry roar, sprang upon me. Hanging on with the claws of one forepaw driven into my right shoulder and the other round me, he tried to get at my head and neck, but I fortunately prevented this by raising my left arm, which he instantly seized in his huge mouth. I sha'l never forget his sharp angry roar, the wicked look of his greenish yellow eves within six inches of mine, the turned back cars, his fetid breath upon my cheek, and the feeling of his huge fangs closing to the bone through my arm above the elbow.

"I endeavored, by giving him my knee in the stomach, to make him let go. Those who have ever kicked a cat can imagine what little effect this had. It was more like using one's knee to a football than anything else. The panther, with a roar, gave tremendous wrench to my arm, hurled me some five pices down the side of the hill prone on my face, bringing my head in contaet with a tree. Stunned and insensible, a lay some seconds on the ground, and the brute, thinking me dead, fortunately did not worry me, but, passing over me, went for the retreating police constable who had brought me into the difficulty. I remember, when I came to, raising my head from the ground, leaning my head against the tree, and smiling with a certain feeling of grim satisfaction, when my eye caught the retreating form of the constable and the pursuing panther down the hill, and I thought

the policeman's turn had come. "The civil surgeon of the station probed the teeth-wounds in the arm, and found that the one at the back of the arm ran right to the bone and was an inch and a half deep. The two wounds on the inner side, in or close to the biceps, were, one an inch and a quarter and the other an inch deep. The olaw-wounds on the right shoulder were not serious, and had fortunately just missed the large artery near the collar-bone, injury to which would have resulted in my bleeding todea'h in a veryfew minutes."-[The Times of India.

Plantation Philosophy.

De pusson what ain't got some selfishness ain't nachul.

Faith mighty often moves der merchinery dat wouldn't move ef dar was less belief. De hoss dat hab got faith nebber looks roun at de load an' in de consequence o' dat fack, he nebber balks.

Litain't fur de lub o' money dat some pustons work. It is 'kase dat when da had ter do it, da got so used ter de cociation dat at las' da fin's it de bes' 'panion. Er pusson ken own er disagreeable dog till he gets so med ter his ways dat sirter er while he arnt ter like him. - [Arkansas Travelet.

ADRY TIME.

When the Earth Drinks up Her Cocans.

Prof. Cookley, of New York, says: Most of the planets have probably cooled down by radiation to a solid under crust like the earth. The sun owing to his greater mass is still a flery globe not yet cooled down so as body of small mass only about one-eightieth of the earth's mass, is supposed to have had time to cool down to a solid globe all the way from its surface to its centre. Its internal heat is supposed to have been all rad iated away into the surrounding cold space. Now the hot interior mass of the earth can, of course, contain no water, and little or none of the free gases that constitute an atmosphere. They would be boiled off, expanded and driven to the surface where are found now the great bulk of our oceans and our atmosphere. But when the earth shall have parted with all i.s internal heat, having thrown it into the surrounding cold space as the moon has done, then the cold, so'id but porous mass within its present crust, which is now incapable of absorbing water or air, on account of the present high temperature, will begin to drink up the water and air just as the parched soil after a summer's drought drinks up the rain, and the ground is dry in a few minntes after the They tola him she was sick, that it would shower. But you may well ask, could the be many days before Tot would be about | solid porous mass within the present crust of the earth thus drink up the whole of the hours to leave town. So Wah went back to his dingy shop and | waters of the Atlantic and Pacific Oceans

While the interior of the earth remains as One day Wah Kee looked over the way to | hot as it is at present it is no more possible ing cold space. I know it has been comput-Tot's voice was weak and Tot might not | ed that the earth receives from the sun antrouble is that the sun himself is cooling off everywhere. N. There were only two carriages—there ets but into the minute pores of its sub-

The proposition appears to be established by strict calcu'ation that the interior of the earth when cold will be able to absorb more than four times, possibly more than thirty times, the amount of water now on its surface. Now, it seems certain that in the They buried her at Fernwood in a little | manner first explained the earth will continue to lose both its superficial water and and even the sun himself, are regarded as doomed at some future day to the same fate. Everything in naturehas its morning of life, stamp for their treatise on catarrh.—Montreal its high meridian of glory and strength, its evening decline and its midnight of blackness and death. In the case of a world—is that the last term of a series?

The World's Telegraphs.

Canada has been represented to be a " slow-going" country. We don't believe it. In the matter of great internal improvements, she stands first among the countries of the world, regard being had to population. In railways she has gone ahead with wonderful rapidity, and in canals she is not wanting, and in telegraphic lines she is as prominent as she is in railways. A recent report of the Public Works Department points out that our telegraphic accomodation is greater than either that of the United States or any European country. The number of offices in Canada is 2,259, or 1 to 1,914 of population, as based on the census of 1881. In the Scientific American it is stated that the number of American telegraph offices in 1882 was 12,917, and the number of telegrams forwarded during the year was 40,581,177. The number of telegraph offices in Great Britain and Ireland in 1882 was 5,747, the number of telegrams forwarded being, 32,965,029. Germany has 10,803 offices, the number of telegrams forwarded being 26,260,124. Russia had 2,819, the number of telegrams forwarded being 9,800,201. Belgium had 835 offices, the number of telegrams forwarded being 4,066,843. Spain had 647 offices, the number of telegrams forwarded being 2,830,186. British India had 1,025 offices the number of telegrams forwarded being 2,032,605. Switzerland had 1,160 offices, Italy 2,590, and Austria 2,696. The number of telegrams forwarded in the last three countries mentioned was 3,040,182, 7,026,387, and 6,626,203, respectively. It will be seen by these figures, having regard to population, that Canada stands A No. 1, while she stands only third or fourth among the nations in the absolute magnitude of her commerce. To say, under these circumstances, that Canada is a "slow-going" country, is to pronounce upon her an unmitigated libel.—[Brantford Telegram, Oct. 31.

GEMS OF THOUGHT.

No weman is educated who is not equal to the successful management of a family, The administration of government, like a

guardianship, ought to be directed to the good of those who confer, and not to those who receive the trust. I know no such thing as genius; genius

is nothing but labor and diligence. The ignorant man hath no greater foe than his own ignorance, for it destroyeth where it liveth.

The key of fate is in our own hands ; we

often unlock it and then throw the key Many people take no care of their money till they have come nearly to the end of it,

and others do the same with their time. The whole of human virtue may be reduced to speaking the truth atways, and doing good to others.

Moon-Blindness.

Moon blindness seems to be the explanation voucheafed by a British Rear Admiral to account for the loss of the gunboat Wasp and the imminent danger of the Trident. This affection is supposed to cause its victime to grope as if in the dark in bright moonlight and to mistake the gleam in a lighthouse for moonshine, One British writer who objects to this not on says he has krown moon-blind men to be eff ctually cured by the panishment of extra duty; and it is really worth while inquiring whether the modern eagerness to theor ze in some unexpected way about disasters on land and sea, does not tend to shelter under scientific speculations simple carelessness and gross betrayal of trust.

What 10 cents Will do.

A 10 cent bottle of Polson's Nerviline will cure neuralgia or headache. cent bottle of Nerviline will cure toothache and faceache. A 10 cent sample bottle of Nerviline is sufficient to cure colds, diarrhœs, spasms, dysentery, &c. Nerviline is just the thing to cure all pains, whether internal or external. Buy at your druggist a ten cent sample of Nerviline, "the great pain cure." Safe, prompt, and always effectual. Large bottles at any drug store, only 25 cents.

A Texan steer -giving a man twenty-four

How They oit.

So called respectable people would hesitate considerable before pilfering your pockets in a crowded thoroughfare. MPrice 25 cents and \$1 per box. A dollar box contain That would be too too. The same discrimination is not indicated by the socalled respectable druggist when that wonderful corn cure, PUTNAM'S PAINLESS CORN EXTRACTOR, is asked for. He will pilfer your pockets in the most genteel manner by substituting cheap and dargerous substitutes for the genuine Putnam's Corn Extractor. Watch for these gentlemen, and take none other than Putnam's

"Time is a great physician." That is because it "moves with a leaden heal."

Catarrh-A New Treatment. Perhaps the most extrarordinary success that has been achieved in modern science has been attained by the Dixon Treatment of catarrh. Out of 2,000 patients treated during the past six months, fully ninety per cent. have been cured of this stubborn malady. This is none the less startling when it is remembered that not five per cent of the patients presenting themselves to the regular practitioner are benefitted, while the patent medicines and other advertised cures never record a cure at all. Starting with the claim now generally believed by the most scientific men the disease is due to the presence of living parasites in the tissues, Mr. Dix-on at once adapted his cure to their extermination; this accomplished the catarrh is practically cured, and the permanency is unquestioned, as cures effected by him four years ago are cures still. No one else has ever attempted to cure catarrh in this manner, and no other treatment has ever cured catarrh. The application of the remedy is simple and can be done at home, and the present season of the year is the most favorable for a speedy and permanent cure the majority of cases being cured at one treatment. Sufferers should correspond with Messrs. A. H. DIXON & SON, 305 complain of the general law of nature? | King-street West, Toronto, Canada, and enclose
