agricultural community. The matter was under consideration of the Government. and their decision would be announced when the estimates were brought down.

Hon. G. W. Rose, in reply to Mr. Brereton, said it would be announced when he brought down his High School Bill next Monday or Tuesday, if it was his intention to introduce legislation, making it obliga tory on the part of County Councils to aid High Schools and Collegiate Institutions in towns separate from counties for municipal

Meredith, that the Government had not yet decided what course they should take with respect to the East Simone constituency representative. Their decision will be made known in a few days.

Mr. Wood moved for a return showing in detail the expenditures made township of Hungerford, by the authority of the Provincial Board of Realth and the Board of Health during the late smallpox epidemie that prevailed in that township, with the number of cases and deaths, and the length of time the epidemic prevailed. He thought many distressing incidents had occurred, and it any one was

to blame it ought to be found out. Hon. A. M. Ross-I have asked Dr. Bryce to make a special report upon the epidemic. That report is prepared and, I believe, now in the printer's hands, and had the motion been delayed a day or two the members would have hed it in their hands and had more means of coming to an intelligent conclusion. From the report of the Secretary to the Provincial Board of Health. I find that the expense has been received by the Secretary to the Local Board, I learn that the expense to the county will be \$10,000. The number of cases of smallpox dealt with is 200, and the deaths from that disease forty-five. The House will thus see that the epidemic and energetic measures were taken by the local Boards of Health, yet in townships such as Hungerford, which are not so well situated for efficient organization as the older settled townships, it was necessary to extend the aid of the Province to the district. It was found that fourteen cases had occurred before the matter was brought to the attention of the Provincial Board. The local medical men refused to attend to the cases, as they knew they would lose their own practice. Que of the medical men did, however, consent attend to the cases, and he was appointed medical officer to the local Board Health; and as to the amount of his bill I am not able to state, but I am privately informed that it was a very large one. After the disease had been stayed the houses, clothing and goods of the persons in the district had to be fumigated, and some of the latter were destroyed. Itinois an outbreak of smallpox had taken place, and though it was of less magnitude than ours it cost more than double to sup-

Mr. Morris considered it unfair that a township such as Hungerford should bear such a large portion of the expense as \$10,000. He wished the House to understand that if such prompt measures had not been taken for the suppression of the outbreak, it would have assumed the magnitude of Provincial proportions. He instanced the case of an outbreak near Halifax, and an extensive outbreak near Manitoba. In the latter place the outbreak was one of terrible proportions, and it had been stamped out by isolation, vaccination and re-vaccination.

Mr. Brereton suggested that the hon. the Provincial Treasurer should include in his returns the ages of the patients treated, the number vaccinated, and the number not ve quinated.

Mr. Ferris said he would like the returns to include the other townships affected by smallpox as well as Hungerford.

Mr. Wood said he had no objection. Mr. Phelps asked that the return should include all municipalities in the Province which had been afflicted by the smallpox scourge. The township of Flos had been afflicted by it, but fortunately the Council of that municipality had formed themselves into a Board of Health according to statute, not knowing that such a disease would occur. He stated the steps which had been taken to stamp out the disease.

Mr. Hudson said the epidemic had spread to a certain extent before any steps were taken to stop its progress. In the first place he understood the physicians attending the families which were taken down pronounced the disease chicken-pox, and several families were taken down before the truth was discovered. It broke out first in a very poor neighborhood. Through the absence of cleanliness it spread more rapidly than would otherwise have been the case, and had covered a considerable district before the Provincial Board of Health granted. He proposed to provide that tion in the regulation and government of got the master into their hands. The Becretary, when informed, at once went down to the township, and the Reeve of that township was appointed Chairman of the Board of Health, after which the disease was almost entirely stamped out. The people were excited at that about the disease, but now they much excited about the bills which had been brought in by the physicians. He understood that the Medload Officer of the Local Board of Health had applied to the Provincial Board to fix his fee, which he understood was \$4,000. He must say he thought this charge very extravagant. The township was very poor. Then there was a bill from Patrick Murphy, who buried the dead, which he regarded as high. The only reasonable bill he was that of Dr. Canniff, amounting to This man had allowed a new building, which he had erected for a store and residence at Stoco, to be used for a hospital, and he would have to go to considerable expense in fixing it up again, in order to make it habitable.

Mr. Fraser proposed an alteration of the motion to cover all the information wanted in the return, which was carried. Mr. Carnegie asked that his motion be amended so as to read as follows: For return showing the several lots in the township of Balmont, Methuen, Chandos, Anstruther, Galway and Cavendish, in the county of Peterborough, and of the town-

gentleman and the House to know that years during which they boots buted. the return will still involve a great amount this means he expected wher would amendment will make some little difference, they were deserving of the utmost sympossible moment, but the House need not of a substantial character urged against the return necessitates a little delay. returns must be made out by the regular | incentive to teachers to remain in the proclarks of the department, and the session fession. Perhaps it was, yet he noticed of the House is their busiest season.

the returns ordered last session, and not some of their very best men. yes brought down, be prepared, and the returns themselves would be brought down include female teachers? as soon as possible.

Hon. A. S. Hardy presented to the House tain the number of female teachers who the report of the Minister of Education for | had left. They had retired for other reasons

1884 and the report of the births, deaths perhaps. The superannuation system did perhaps. The superannuation system did in which Mount Forces is interested. We not appear to retain the teachers, and the don't think it desirable to pass legislation Hon. G. W. Ross introduced a Bill to argument he had mentioned against doing amend the Public Schools Act. In doing so, away with it did not need to restrain the he departed from the usual procedure by House one mement in the action he proentering upon an explanation of the posed to take. The law required each The arrangements child between 7 and 18 years of age law, were that the rural schools and the he stated a moment ago there were 88,000 law respecting them should be treated children in the Province not fulfilling the under one distinct head; secondly, that law in that respect. In the case of chil the same treatment should be adopted with dren attending factories he proposed that regard to unorganized townships, and after rassing a certain examination they \$1,800 to the Province, and from the report | thirdly, cities, towns and incorporated vil- should be exempt from attending school lages should be dealt with. Having dealt half the time, namely, the examination tute. with the schools under these various heads, required for a pupil for promotion from the then he proposed to arrange the educating third to the fourth book. At this stage of books. Then they would have legislation their educational career children were for the support of the schools. Next they generally from 11 to 12 years of age, and would deal with the teachers, the different he proposed that such of them as worked in was one of great magnitude. While prompt officers administering the law, and lastly factories should be exempt from attending with the pains and penalties. The first school at least a portion of the time. What amendment was with regard to the school he wanted to provide for was not simply age. Looking at different clauses of the attendance at school, but the education of against the out idity of overreaching people. present law they seemed to vary, the the pupil. Although the school age was from school age ranging from 5 to 16 years in 5 to 21, the compulsory clauses only affected one and from 5 to 21 in another. He pro- those between the ages of 7 and 13. Another posed to establish definitely that the school provision which he proposed of a more age should be from 5 years to 21. The radical character was for the election of next amendment which he thought neces school trustees on the same day as the sary was in regard to the qualification election of municipal councils. It would of a ratepayer to constitute him a voter be optional with the trustees by a resoluor a school trustee. Under the Municipal tion passed in October to order that the Act it was necessary that a voter election should be held on the same day as should be a subject of Her Majesty, that for members of the Council. It would or that he should have undergone the be by ballot, and so far as the Municipal process of naturalization. No such arrange- Act was capable of application for the ment existed with regard to the election prevention of corrupt practices, etc., it enemy. of school trustees, and he was just simply should apply to the election of school following the analogy in that matter which trustees. This did not apply to the the number in the municipality between to consider it and that the subject might care. All druggists. the ages of 7 and 13 would be required to receive that public discussion outside of report their names, so that this list could the House which he thought was desirable be compared with the school register, and in school legislation. He thought it was 5,000 years if it has a chance. However, at once a complete chain of evidence would desirable that they should get this session a measure as nearly perfect as possible in the experiment, because in this country, observed the law in the matter of attending order that, for at least five or six years to long before the baobab tree was half that

> the school laws. Mr. Meredith-I apprehend that he does with disappointment. not propose any corresponding changes in respect to the election of Separate School

Hon. G. W. Ross-I do not, and it optional all around. Hon. C. F. Fraser said the House will remember that when permission was given by the House for the erection of new Par ties in the law relating to the liament Buildings it was qualified with the very important fact that no more than that the school trustees should pay a House will also remember that some sesteacher for the holidays that immediately sions ago a report was made which stated followed the term of his engagement. Sup- that in the opinion of the Executive Council pose a teacher taught up to the vacation in they could not be erected for the sum July, the holidays were somewhat long, named in a style fitting for the Province and he was entitled to be paid to the end and the needs of the Government, and irritating, and in fact many complaints rests with the Executive Council for not were made and many expedients resorted taking action especially when it is rememto by School Boards to get rid of the re- bered that it was stated that no steps would

Mr. Morris moved that it is expedient the holidays in proportion to the time and desirable that any city, erected as such under the Municipal Act, which shall petition therefor in due form, shall be entitled There were a number of teachers holding to be granted by the Legislature, if, on due old first-class certificates which were lim- consideration of the circumstances thereof, ited to the county in which they were it shall see fit, a special Act of Incorporathese should be valid in any county of the its special interests. He argued that it were all men of considerable experience, Hamilton, London, Ottawa, etc., if they could have special charters as Halifax and

the vast expenditures of Toronto. gests that the proposal contained in the motion is one of great importance, but see that it is of no importance of all, and that is very easy to demonstrate. My hon, of irritation arose over the fees required friend has not suggested one single advantage to be gained by the motion he has pro-This Bill provided that they should be posed. The position of the Government is paid the same amount as members of this, that we are in favor of general laws, should send three letter stamps for large the County Council. He proposed another so far as we can have general laws. We have always acted upon this, and though it of cure. World's Dispensary Medical was a deal opposed as first it is one that the ing that councils pay the examiners so people of the country now recognize the

much per candidate. Examiners also great advantage of. Mr. Ballour moved for a return of copies sufficiently liberal to pay their travelling of all reports made to the Government by expenses, in addition to those required by directors of joint stock road companies for law. He was making a provision whereby the year 1884, under section 146. cap. 152, they would be paid liberally, their expenses of the revised statutes, as amended by s. s. to be determined by the County Council. 6 and 7, cap. 24, 47 Vic. He stated that Coming to the question of superannuation, Mr. Lee had consented to incorporate u he was going to propose a scheme by which the motion such portions of his motion were not entried by the notice he was abolished. First, no teacher would be re- ing. He thought there was a general de quired to pay into the Superanumation to abolish tell roads. It was expected the Fund. Becoudly, those who were con towns and cities would continue, would be allowed to do so, the but this was not the case.

propriety of introducing legislation during subject of University Pederation. Until be after that decision has deen arrived at it expense will be.

Hon. O. Mowat, in reply to Mr. More. dith, said: As far as I am concerned there is but one other place concerning which notice has been given for the formation of a new county, and that is the one

for that during the Present session: Mr. Mowat said the report of the Special Committee appointed to strike the Standing Committees of the House had been laid over in consequence of Mr. Drurg's pame being mentioned. It was very necessary that the committee should be organized at once, and he therefore suggested that the committees should be printed without Mr. Drury a name. He proposed this without prejudice to Mr. Deury or his constituency, and retained the right to choose a substi-

Mr. Morris saw no objection to this. The motion was carried.
