A SECRET
The secret of beauty lies in pure blood and good health, Burdock Blood Bitters is the grand key that unlocks all the secretions. It cures all Scrofulous Diseases, acts on the Blood, Liver, Kidneys, Skin and Bowels, and brings the bloom of health to the pallid cheek.

LEG BROKEN.—We regret very much to learn that Mr. Arch. Neilson near Proton Station, had his leg broken on Tuesday evening. He left for home about 7 p. m., with horse and buggy, and while driving down Steven's hill near this village, the horse commenced to act ugly and broke a shaft, then started to run away throwing Mr. Neilson out with above result. Mr. John Moffat overtook him where the accident happened and took him to Flesherton where he had the limb dressed by Dr. Christie.

AFTER SEVENTY-THREE YEARS' SUFFERING.
Rev. Wm. Stout, of Warton, was cured of scrofulous abscess that seventeen doctors could not cure. Burdock Blood Bitters was the only successful remedy. It cures all impurities of the system.

FIRE.—Jas. Nash, Artemesia, lost dwelling and outhouses by fire on Monday night last; about 11 o'clock p.m. while all were asleep Mr. Nash was awakened by the cracking of the fire but not in time to save the house, and only a part of the clothing was saved, the furniture being all lost. The wind was blowing towards the barn which stood about 10 rods distant and fired it, no help being within reach the out-buildings were consumed with contents. The fire is supposed to have originated from the chimney. Loss about \$800, insured for \$200.

THIS IS RELIABLE.—
R. N. Wheeler, Merchant of Everton, was cured of a severe attack of inflammation of the lungs by Hargyrd's Pectoral Balsam. This great throat and lung healer cures weak lungs, coughs, hoarseness, bronchitis, and all pectoral complaints.

Building up a Hay-Stack.

The great point to be secured in stacking hay is, to keep the center the highest. If this is done, water can not penetrate into the stack, but will find its way to the outside under the most unfavorable circumstances. If on the other hand, the center is hollow the water must drain into the center, and so run the stack. An excellent way to build a stack is to set a tall sapling firmly in the ground, with a foundation of rails around it; then begin at the center, and place the hay about the pole, gradually spreading, until the edge of the base is reached. Continued building up the stack, the highest in the centre around the pole, the builder standing in the center so as to tread the hay firmly there. As the stack settles, the outside sinks more than the center, and helps to make the stack better. The top of the stack is finished by fastening a covering of hay to the pole, with hay bands wound firmly around it. A stack so made will not leak, and even clover hay may be safely stacked in this manner, because the water must make its way to the outside by the force of gravity, and escape there by dropping to the ground clear of the stack.—*American Agriculturist* for July.

AN EX ALDERMAN TRIED IT.
Ex-Alderman Taylor, of Toronto tried Hargyrd's Yellow Oil for Rheumatism. It cured him after all other remedies had failed.
