O. W. Butledge, Proprietor. MARKDALE, AUG. 25, 1887

BOLLER MILLS.

Bort Elgin has carried a by-law granting a loan of \$5000 to a Mr. McKay, of Underwood to aid that gentleman in erecting a roller flouring mill. It is significant how our neighboring towns have to give bonuses to encourage those desirable enterprises while Markdale has two of the best roller mills in the province, neither of which had any offer or inducement other than the natural advantages o a live town and prosperous sursounding district.

THE OUTLOOK.

farm products can now be made with Dominion, Confederation is doomed. reasonable correctness.

We learn from the reports given through various sources, that the yield is far short of what was anticipated two months ago. The almost ful mood at present. universal and continued drought over this continent has had a serious effect, and while the farmers in this county tv. are more or less inclined to complain owing to their sanguine prospects being to some extent blighted, we can say, from authentic reports from the various districts in Canada and the United States, that on the whole, we do not know of a county which shows as good general returns as Grey.

While it is not well to be elated at the expence of others, it is certainly a just cause for gratitude, and of contentment and encouragement, that the seasons operations are so favorable with us, and it becomes the duty of every individual to make the very business principles. best of his circumstances.

one of the most abundant and well making a market for all our surplus hay at good prices, and as hay can be pressed at small cost, the difficulty (of the shipment to distant parts is overcome. Then the dairy intersts are day. booming. The make of butter and cheese up to the middle of July was something enormous. . .d now that showery weather has set in we may look for fair returns for the balance of the season, and in order to increase the flow of milk, bran or other food Eye and Ear Infirmary at Toronto should be liberally fed in order to general Hospital. I had been told so make up for the want of nutritious grass, until the effects of the drought is over. The price of butter and cheese is very high and still advancing. and treambling. After a few moments The balance of the seasons make of cheese is being bought up at from 12 to 13 cents, which is the highest ever. The lady nurses are kind and attenknown at this season of the year; tive, and the food nurishing and palthis great advance in cheese is doubt. | atable. It might seem invidious to less caused largely by the universal parlicularize the medical gentlemen, drought over the continent.

for encouragement, being free from surgical skill and truly Chaistian damaging floods and devastating fires | qualities of Dr. Reeves, whose conwhich have swept whole districts, solatory words ever revived my droopwhile in other parts the chinch bug, the gopher or other pests unknown here have worked destruction, while the ed is as nothing, when compared with draught has been the least felt here of the scalding eye-waters I had been any district as far as known.
