HOUSEHOLD.

Extravagant Economies.

Many water who are extremely frugation other things seem to have modides of the value of time. Of their failure in this direction a writer gives a few examples :

"Do you not know many homes where the supply of cooking utenails is so unneces sarily limited that a good deal of time is daily wasted and much extra labor expended in preparing the meals, by having to wash one saucepan in which to cook a second dish that could as well have been cooked with the same fire, and watched at the same time as the first? Or a towel must do duty as strainer or colander, no account being made of the time required to wash the towel nor of its becoming wern or stained ? Or a silver spoon is used to stir or lift food for the lack of iron or wooden ones? Why not afford such kettles and pans as are really needed for advantageous cooking, and * save' in some other department?

"Have you ever seen some busy housegarment is added to the line, trying to make the pin hold two and sometimes three articles? Since good clothes-pins can be had for five cents per dozen, it seems rather fardouble the time really required to shake out over the whole. and hang the clothes, and run the risk of taking cold while so doing.

"Could any arithmetician compute the number of half-hours spent in rearing a family of half a dozen children, in untying 'hard knots' in shoe-strings that are too short or are so worn as to require tying in more than one place, and must again be untied before the little shoes can be taken off Shoe-strings cost, it may be, ten cents per dozen pairs. Could the hours which some mothers spend, during one year alone, in managing worn out shoe-lacing in order to save a few cents, not better be utilized in doing some sewing or other work, by which enough could be earned to stock the family with shoe-strings for life?"

Minor Details in the House.

Trifles make the sum of life, it is said certainly they do of life in the kitchen and dining room. And the wife who by her of cream and the yolks of five eggs; gradskill and knowledge of detail knows how to save any fraction of the sum allowed her for house-keeping is really one who brings more happiness into the dwelling than the wife whose income doubles her husband's. This skill and knowledge are the portion of every wife whose mother has taught her to observe the seemingly trivial things of good house-keeping, the minor details of daily living. And whoever has these little things at command will find them a more integral part of family happiness than familiarity with the differential calculus is. And although Greek and Anglo-Saxon and high philosophy and natural science may be requisite and delightful acquisitions, yet it is evident that they are incomplete without the previous requisites of bodily comfort and mental quiet.

And That Reminds Me-

When the burners of kerosene lamps be-

and placed on the forehead is good for a sick headache. If the eyelids are gently vinegar, one ounce of cloves, one ounce of bathed in cool water the pain in the head is ground cinnamon. Boil thirty minutes. generally allayed.

When there is a rat hole through plastering, or between the stones of a cellar wall, the most effectual way to stop it is to fill it with plaster of Paris mixed with broken glass. Holes in wood are best stopped by nailing tin over them.

The cleanest and most perfectly polished floors have no water used on them. They are simply rubbed off every morning with a large flannel cloth, which is soaked in kerosene oil once in two or three weeks. Take the cloth, and with a rubbing brush or stubby broom go rapidly up and down the planks (not across them). After a few rnb. bings the floor will assume a polished appearance that is not easily defaced.

If you want a pleasing and interesting object on your mantle shelf, try growing an oak tree in a bulb glass. St end an acorn water contained in a hyacinth glass, and months, when it will burst and throw down a root into the water and shoot upward its straight and tapering stem with beautiful green leaves. These miniature trees live but a few months, but during that time afford considerable interest.

"Roman toilet paste" is cool. merely the white of an egg, barley flour and to use, and does not do the work any better | nevertheless, a thief. than oatmeal. The roughest and hardest hands can be made soft and white in a month's time by doctoring them a little at bedtime; all the tools you need are a nail brush, a bottle of ammonia, a box of powdered borax and a little fine white sand to rub the stain off, or a cut of lemon, which will do even better, for the acid of the lemon will clean anything. Manicures use acids in the shop, but the lemon is quite as good and isn't poisonous, while the acids are.

Cooking Recipes-

BLACK PUDDING .- One-half cup each of raisins, one teaspoon of ground cloves, two and-half cups of flour, one teaspoon of baking powder; steam one hour. Sauce: Mix of butter, sugar and nutmeg.

of grated chocolate, the same of white sugar, of surprise were exchanged—the fatal roseone cup of sweet cream; mix together and | bud was not the child of nature, but an exnet over the fire and let come to a boll. cellent artificial imitation.

Pour it over cornstarch pudding, or put between layers of cake.

JOHNNYCAKE. - One cup of cornmeal, two cups of flour, one cup of milk, one half cap each of butter and sugar, three eggarance teaspoonfuls of baking powder.

serve cut in slices.

PIE CRUST.—One quart of flour, one teacup of lard two tea-spoons of baking powder, a pinch of salt, cold water enough to make a dough not too stiff.

RICE.—Boil one cup of rice in water until wife hanging out clothes on a cold, windy well done, stir in two beaten eggs, half cup day, taking off a clothes-pin each time a of sugar, one and a half cups of milk. Pour into a dish and grate nutmeg over the top.

Hor SLAW .- Cut half head of cabbage up fine, pour salt, pepper and vinegar over it, take one cup of milk, two eggs, small piece fetched saving to stand on the icy ground of butter, one cup of hot vinegar and pour

> CORNED BEEF .- Boil until soft enough to remove the bones; place in an earthen dish and pour over it the water it was boiled in. Place a plate on it and a heavy weight: have sufficient water, so that when the weight is on it will come to the top of the meat; let it stand until cold then cut in

> CUP CUSTARDS.—Beat five eggs with three quarters of a cup of white sugar, add flavoring and one quart of sweet milk ; pour into cups and place in a baking pan of water. Bake in a slow oven.

POTATO CUSTARD. - Grate six large potatoes and add to them one quart of boiling milk; stir in three beaten eggs and onequarter of a pound of sugar; boil seven minutes, taking care not to let it burn, then add one half cup of butter. This will make three good-sized custards.

LEMON CREAM.—Beat together one quart ually beat in one half pound of white sugar and the grated rind of four lemons; pour into a porclain kettle and let it come to a boil; remove from the fire, and stir until nearly cold, squeeze the juice of the lemons into a dish and pour the cream upon it, stirring until cold.

tablespoonfuls of ground mustard, three gills of mustard seed, two tablespoonfuls of ground pepper, two tablespoonfuls of ground cinnamon, one tablespoonful of cloves, one pound of brown sugar, three quarts of best vinegar. Boil all together until quite done. If you choose you may put one spoonful of ground and a portion of cinnamon bark. Celery tops improve the flavor and some odd cloves of garlic, mind Spanish garlic. If more convenient peaches just turning ripe, sliced, can be used instead of green tomatoes.

RIPE TOMATO CHUTNEE.-Take seven come clogged, put them in a basin of hot pounds of ripe tomatoes, with the outside water, containing washing soda, and let skins taken off, put them in a stone jar with them boil for a few minutes. This will make | three pounds of brown sugar, one pound of them perfectly clean, and almost as bright stoned raisins and some cloves of good garlic. Place the jar in a vessel of boiling wa-Coarse brown paper soaked in vinegar | ter and let the tomatoes boil until the sugar penetrates them, then add one pint of good Then put up. They will keep any length of
