You mean, Mr. Bowser ?" right! You just keep on and will come out !" blow that fence down, Mr.

You were here all the time. the wind, but where are your didn't you wreck the barn

And one evening when he came home look. Sir Charles Tennant's Remarkable Daughing out of sorts and I asked him if anything was wrong he snapped me up with :

"Boil coming on my leg !"

"That's too bad." "Yes-um-I understand!"

"What do you mean, Mr. Bowser ?" "Never you mind. You keep right on and see where you will end."

"But am I to blame that you have a boil on your leg?"

through a mill stone as well as the next

"Mr. Bowser, you don't mean to insin-" "That's all right. Just keep right away from me. I have long had my suspicions, and this confirms them. I'll look over my accounts to-night and have a plain talk with you in the morning."-Detroit Free Press.

SNOW IN THE SIERRAS.

A Hormit Living Forty Feet Beneath The Surface-A Lost Cabin.

Lake, writes that the snow in that brightest gem of the high Sierras is forty feet deep on own. the level. He constitutes the whole and sole population of the once famous town, and has about him whole streets of houses that are inhabited by nothing except the they have been driven from Canada and Laghost of dead hopes. He has a dwelling, the | brador by large bands of gray wolves. most desirable two-story house in the place. Discretion and good nature have always way you do. I was intending to go to This he enters through a trap-door placed in theater to-night and here I come home the roof and opening downward. His stovefind you flattened out, perhaps to de- pipe stands fifteen feet higher than the top a case of yellow fever or smallpox." of the roof, yet snow has this winter been Bowser goes tramping around to find over the top of it. He has from the trap door with his supper, with the cook, with in his roof an incline in the snow, in which with the furnace and with every- steps are cut, that lead up to the general relse which he happens to think of, and surface of our planet. This he frequently evening is rendered very cheerful and finds filled with snow of mornings on letting down his trap door. A principal part of his happen to be looking down the work this winter has been digging his way to daylight.

Just in the rear of his residence is a threestory building which he uses as a workshop. In the beginning of winter he entered this by a door on the ground floor; later he reached it through a window leading in from the balcony of the second story, and finally he was obliged to use as a door, the uppermost window in the third story; even this he has often found it difficult to reach, the snow being smooth and level over the top of

On one occasion this winter Mr. Hartley ascended to the surface, mounted his snow shoes, and glided down the mountain to the Fordyce dam in search of mail matter. He was only a few minutes in going a distance You've been careless again. You sat in of three or four miles down a hill; but to office with your feet out of the win- return was the difficulty, for while he re-For you held a chunk of ice on your lap, mained waiting for dinner a furious snow-

He started for home in the midst of the storm. In the light snow and going up hill, his snow shoes were of little use. In the That's it! Got the black plague or the | blinding storm he lost his way, and was for atic cholera hold of you, probably ! I was several hours wallowing in the snow. At gover to Mrs. Cato's to-night to a pro- last he ran his head against the sharp end sweenchre, but this spoils it all. I'll have of the branch of a pine. On examining this edoctors up after tea and have the am- he knew that the limb was one he had lopped off a tree that stood within about one in Mr. Bowser sheds tears and I go and | hundred yards of his house. From this abrick for his feet, tie a towel around | point he got his bearings, and at last reachand, send baby upstairs and stop the ed and dug his way down into his home—a house beneath a level plain of snow forty feet in depth.

A couple of the owners of the Butte Saddle mine went up there last week to see if everythey feel that they must keep this fact thing was all right. So much adn't you knock all the chimneys for preventive dentistry, which should be our highest aim.

The Waterous Engine Works Co. of Brant-Did baby do it? Did some of ford have just completed for Duncan McCormack of Montreal, at Casselman, Ont., one of the most complete saw mills in Eastern Ontario. It consists of a 70 horse power engine, two large boilers, circular saw irons, with improved carriage, consisting of five log seats with rope feed, heavy three saw double edger, double trimmers, swing saw, friction bull wheel, shingle machine, combined planer and matcher, sawdust carrier, live rolls, &c. Their men are now at work constructing a similar mill at Lachute, Quebec, for Messrs. McGibbon & Co., which will be started in a few days. In both of these mills can be seen at work their new friction grip pulley, which is sufficiently strong to stop and start with ease the heaviest circular or gang mill without stopping the power. This pulley will be a great acquis tion to mill men and from its strength and effectiveness is sure to have a large sale. We would advise anyone troubled with the old style of friction clutch pulley, or who desires to stop and start heavy J, LATIMER KERR. machinery without interference with the power, to write them for information. Their tablished 1970 by Land Rolling & Co. friction grip can be attached to old pulleys as

well as new.

Sir Charles Tennant's house in Grosvenor Square, says a London correspondent, is one of the most popular in London. This is ow- the golden opportunity of a lifetime. If ing chiefly to the brightness and cleverness | those who complain of weakness and debility of his daughters. There were originally have hacking cough and pain in the side or four of them, but the second, who married chest, poor appetite, broken sleep and other the Hon.
