LATE FOREIGN NEWS

A Costly Library.

NO SOCIALISTS NEED APPLY:

Bacilli in Telephones.

A NOVEL FORM OF FRAUD.

The easy going ways of the Danes are productive of longevity. Among 2,000,000 inhabitants more than sixty have died so far this year who had passed the four score and ten. Quite half of them were nearer 100 than 90 years old.

Probably the finest and costliest college library building will be the one which has been built for the University of Leipsic. Three million marks were expended on it. The library of the University consists of 510,000 volumes.

A bomb weighing 134 pounds was dug up by a gang excavating for a cellar in Copenhagen. It was a "remembrance" of the bombardment by the English fleet in 1807, that threw Denmark into the arms of Napoleon and ended in robbing her of Norway.

Many French scientists are devoting their time to the planning of a balloon capable of being guided. M. de Freycinet has lately exhibited a most ingenious machine, which secures great force with very little expenditure of energy. Many people look forward to seeing a guidable balloon in the near future.

M. Maurice de la Sizeranne, the blind philanthropist, lately left Paris for Kiel and Copenhagen to study the charitable institutions of those cities, and to be present at an international congress in aid of the blind. He has founded an institution in Paris, which does a great deal of good work in training the blind to earn a living for themselves.

A cabinet-maker in Cattlos, being too tired to walk home, received one night no sleep in his workshop. As there was no bed in the place, he lay down in a coffin, which he filled with sawdust in order to rest more comfortably. He soon fell asleep. The next morning he was found dead in the coffin. It is supposed that an apoplectic fit was the cause of his sudden decease.

An athletic Copenhagen lawyer is the latest candidate for histrionic honors. His début on the stage was made as a fiddler, playing a sentimental ditty with an 80-pound weight hung from each wrist. When called before the curtain by the enthusiastic audience he put on an extra ten pounds and played his piece again, as it nothing was quiss.

A German engraver residing in Genoa, stole several plans of the fortifications of that city. His theft somehow came to the ears of the authorities, and the workroom was examined with the result of finding the stolen plans. It is believed that the action of the authorities was taken early enough to prevent the exportation of any plans to Germany. The engraver is now awaiting trial.

A burial circle is reported from Aix-la-Chapelle. When the corpse of a woman railway man and a passenger were found standing on a platform for the purpose of receiving the dead body. The engineer then took the corpse in his arms and carried it to the train, where he placed it in a two-by-two seat, and, with the assistance of a guard, succeeded in depositing it safely in a third-class carriage.

The postal authorities of Prussia have introduced a new method of preventing the use of postage stamps that have been washed off letters and used a second time. Each stamp is now perforated with a number, which is registered in the office to which the letter is addressed. If the stamp is found to have been washed off and used a second time, the number is reported to the office from which the letter was originally sent, and the sender is fined.
