than all the dentists can by performing their usual dental operations.

It must not be inferred that we can, by any means, always or in every case avoid the necessity of filling children's teeth. But when cared for properly the defect would be detected at so early a stage that the operation for repair (filling) would be painless, not tedions, involving but little expense, and its durability beyond question. If not filled then, while decaying, the month will be foul and unhealthy, the lips and tongue will be irritated, often severely, by the rough and iagged edge presented, the decay will be likely to reach the pillp, causing excrueinting pain, the death and prematureless of the tooth and lasting injury to the jaws and position of the incoming set.

inst appearance through the aging, no matter how young the child may be, even if born with teeth, as some are.

They should be kept as secapulously clean as the cheeks, the eyes, or the cars, for they will suffer more from neglect, even though only be the only food for the younger years. he brush is only thing that will

al anything gets into the eye remove it as soon as possible, using the folded corner of a clean line linen handkerchief for the purpose. The eye should not be rubbed of wiped too hard, for that will cause further

Plenty of sleep at the right time—an absolute negresity for almost all women. This sleep should be taken during the night, and should not begin later than ten o'clook, that is, one should retire at or just before that hour. To make up for the lack of sleep in the morning hours after seven a. M. will not compensate for the sleep which one loses before midnight. The object is the conservation of one strength by early sleep rather than the making up for lost sleep and rather than the making up for lost sleep in

whele can readily be washed or sponged off after it has been through the mud to look as fresh as when new. A broad band of this material is stitched around the liotion of the skirt inside, and such a skirt is of a walking length which gives glimpses of the ankles. Some women use a sort of mackintosh cloth and sew it on the loutside as well as the inside of the foot of the skirt. Short petticoats can be worn with a skirt thus finished, as it does not get wet and clong disagreeably to the ankles and feet. Change of air occasionally is an absolute necessity to most persons, indeed it is good for everybody. Farmers indeed it is good for everybody. Farmers had every of change of pasture for their animals better than for their wives and children, and give them the hange. Change of air necessitates change of scence and conditions, and these are as good for health of an necessitates enable or section and conditions, and these are as good for health as the change of air. Persons whose permanent home is near the sea should go to the mountains, and rice read. Persons who live inland are usually boundlitted by crossing the ocean or be living right it for a time.

It is so seldom that an honest expression of Toronto's greatness comes from a Montreal source, that we are tempted to quote a portion of an article in a recent issue of the Hitters of that city, in which the terminate of the second companion of t portion of an article in a recent is such of the litures of that city, in which the two cities are compared. In this case simple insite is defined to make the comparison. The litures says:—'It cameout through the recent census that Toronto and Montreal are about the only places in Canada which are really prospering; and Toronto much more than Montreal. Owing to the ween policy of the railways in arranging cheap trips between the two cities during exhibition time large numbers of Montreal. The litures says and their eyes were wide open, not only to see the evidence of that lity had been awakened by reports of startling progress, and their eyes were wide open, not only to see the evidence of that lity had been awakened by reports of startling progress, and their eyes were wide open, not only to see the evidence of that lity had been awakened by reports of startling progress, and their eyes were wide open, not only to see the evidence of that lity had been awakened by reports of startling progress, and their eyes were wide open, not only to see the evidence of that lity had been awakened by reports of startling progress, and their eyes were wide open, not only to see the evidence of the will known that the lity had been awakened by reports of startling progress, and their eyes were wide open, not only to see the evidence of the work women beenpied in the well-known that the same and excitement among the large crowd of rebellious women and girls.

The literatory, of M. Bogdant the well-known than the proprietor intended to lower their wazes, but the large crowd of rebellious women and girls.

Another Engagement.

She was resy and piquant and slonder: Her beauty was wine to my leart As she leaned o'er the base leaved. Groesser, appeared on the scene, and aministered a most awe inspiring reprimand to the oldstreption. Powerty, the frustration of one's purposes; ill-luck, as we call it; all the soft eyes grew wisful and tonder, And suddenly trembled a tear.

And I kissed her, theravishing dear! On her drooped lashes; oxpansive and fan-like outskirts of Toronto which are probably not excelled in beauty of architecture by any city region in the world. There are many things in which Toronto outdoes Montreal. Her retail trade is, in some lines at least, of a superior class and more competitive. The people of Toronto, though much smaller in number, have a larger purchasing capacity, have a larger purchasing capacity than those of Montreal, and when we of the independent order.

HEALTH.

Obliden's Tech.

Let good digestion wait on appetite and health on both," says Shakespeare. Health will fail to "lwait" on either if pacents will allow their own and their chuldren's teeth to become a mass of decay" at an early age.

There is no one point on which people are so careless as the proper care of children's eith required by the second set of teeth.

People do not relish the idea of leing told, they are, careless or worse, but fit would seem that a subject of such vital importance would rejeive the most careful attention.

Incachilable harm is done to both the health of a child, and to theintegrity of the second set of teeth, in allowing the temporary teeth to become decayed and abscessed, carrying pain and suffering and frequently indigestion and all its accumulated tevils.

The number of children who have decayed the first set gone and the second set of teeth, in allowing the temporary teeth to become decayed and abscessed, carrying pain and suffering and frequently indigestion and all its accumulated tevils.

The number of children who have decayed the first set gone and the second set is ally broken down, is too great, "Neglect is the mortal onemy of the teeth." If the first set gone and the second set is ally broken down, is too great, indication and all its accomulated tevils.

The number of children who have decayed the first set, should be filled with plastic filling macerial and letters.

Neglect is the mortal onemy of the teeth." If the first set gone and the second set badly broken down, is too great deal of good can be accomplished by keeping the teeth brushed and chand all the dentits can by performing their usual dental operations.

But a great deal of good can be accomplished by the way one should use and the second set is not to them a foreign to the second set is not to them a foreign to the two exhibitions in the past and that a first past and the dentits can by performing their usual dental operations, and the manuer of the second set is not of the two exhibitions in the p

WIFELY DEVOTION.

Follows Her Husband to Siberla.

A "Queer Story from Russia." is given in the current issue of the Christian World. It is concerned with the ill fortune of Boris Pliaskin, editor of The Scobada, and his wife. The editor wrote in indignant article about the tyramy exercised by the authorities of Mosebw. University The sentence of the Court was that Boris Pliaskin, should be sent to Siberia for life, and that he must spool ten years in penal servitude in the mines. When this happened Pliaskin had been maried a little over two years. His wife was a delicate, dark-haired, large-cycel girl, full of romance and poetry, passionately attached to her husband. After

ly attached to her husband. After

had been passed Anna Michaelovna was
stricken with brain fever. Thice months
passed before she was able to git about, and
she then announced her fixed intention of
joining her husband in Siberia. In early
December Anna Michaelovan left Moscow,
and in three days acrived at Ekaterinen. igh joining her husband in Siberia. In early beceabler Anna Michaelovan left Moscow, and in three days arrived at Ekaterinen-burg on the contines of Siberia. The railway went no further, and the only mode of transit now at her disposal was the Siberian sledge. The dauntless girl—she was only twenty—passed day after day, week after tweek in her sledge, snatching how and then troubled noments of sleep. Flom It kutsk it was two weeks' journey to Nertchinsk, where the silver and lead mines are, 3500 miles from Moscow. She arrived worn out with sleeplessness and fatigue, suffering agony from frost-bites on face, hands, and feet. She at once made inquiries as to the mine in which her husband was, but until she bribed the officials, whose duty it was not to give her this information, she could obtain no clue to his decreabouts. She lost fo time in reaching the lead mine where Plaskin slaved, but as she now knew that no official permission would be given that the officials permission would be given that the official permission would be given to the permission would be given to the permission that the permission that the permission that the permission that the p

Under date of Winnipeg, Sept. 21, a correspondent writes: "I have now completed he circuit of the principal wheat-producing districts of Manitobs and some respondent writes: "I have now completed be circuit of the principal wheat producing districts of Manitobs and some points in Assimiboia, N. W. "I have some that the stories of the great harvest of the Vest were not exaggerated. No language could be too strong to abscribe the marvel onesgrowth of this year's crop. This harvest has demonstrated more clearly than ever the extraordinary fertility and magnificant capabilities of the Canadian Northwest as it wheat producing country. In numbers of cases I have seen crops harvest ed which would stagger eastern farmers by their luxuriance—crops which by ordinary rules of farming could never he expected to grow sown from poor seed, scattered care lessly over land which already had grown two crops without ploughing, scratched over once with harrows and left to take chances. Hany settlers have reaped unmited over once with harrows and left to take chances. Hany settlers have reaped unmited in the success. The sharp contrast to the growth of these crops comes the duestion of their ripening and the danger of frost, which at present is the most serious drawback to the development of the country. Farmers contend that one good crop, compensates them for their loss and yields good profit for every two lost. With that established it is easy to see "what enormous profits farmers would reap if the danger of frost was overcone." The question, therefore, is of paramount importance and must receive attention lefore all others. The frost in Manitola this year was not so severe as in others, but was sufficient to cause very considerable loss to the country. The full extent is not yet definitely known. The story of the hirvest will be told in threshing. Until then any estimate is liable to be wrong. At the worst I personally do not expect their will be margificent sample No. I hard. A good majority of he remainder will be good for milling purposes. Regarding the yield, so the far all returns are very encouraging, wheat running from 35 bushels to as high as 42. Vields lke that will go fa
