Evidently the tunnel was the forts. Evidently the tunnel was so the forts in the forts it gives the forts the fait of the forts and the fait of the forts the forts of the forts of

et us look back a little. They were wicked and they were rich. Everything seemed to go well, with them. All was prosperous hid well. House, and barns, flocks and burds, quivors fult of children; the timbred and theydahee; barp and sackbut, and all manney of delights were within their reach, and giving themselves to all these material seen, the yain and the foolish. When formed Duke VIvlami said to him, "the wast formed as St. Chir, and danger from water being delicate drive a thousand. The wealthy man has all heart could desire, and because his leart is estistical and filled up with the princess myself." A short time after twenty-one point the Princess myself." A short time after twenty-one point of the Princess myself. A short time after the Grand Duke Alexander set off to Copenhagen over him; and in the sad self complacency of the man who lives only it the visible and the present, he asks who is the Almighty that we should serve him? This may's son! is satisfied with wealth. The present, and the temporal, like Esan, he would have sold aff the birthrights of leaven, for as miany meals of the save y red leaven for a mian meal of the save y red leaven for a mian meal of the save y red leaven for a mian meal of the save y red leaven for a mian meal of the save y red leaven for a mian meal of the save y red leaven for a mian meal of the save y red leaven for a mian meal of

the would have sold all the birthrights of beaven for as many meals of the savery red pottage his loved. God or manmon it is sure to be. God and manmon it can never be. "What profit shall we have?" As long as that question, or the spirit of it in any degree is in the heart or on the lip all thought of serving God may be abandoned. With any such "therefore" behind there can be no worship, no service, no being any such "therefore" behind bere can be no worship, no service, no yalty. The worship of material things at soid in total eclipse. Beware these wful "therefores."

FAMINE IN RUSSIA. phentifical Mixtures Sold for Brend-Inc

Inhealthful Mixtures sold for Bread-Importing Food from America.

An analysis of the bread sold in many paces in Russia by unscriptulous merchants shows that poisonous mixtures are sold. Several merchants have been arrested at Morshanek and will be tried. Many specimens of such bread consist of 70 per cent. of carth and sand and 30 per cent. of refuse farinaceous products. of earth and sand and 30 per cent. of refuse furinaceous products.

Among the many conjectures regarding the causes of the failure of the crops, it is aggested that the drainings of hundreds of verts of the wast swamp of Pinsk resulted in flooding the Dineper in the spring and owness of water late in the summer, thus causing a diminutton in the rainfall in the existent provinces.

Almost all of the Government officials where voluntarily contributed a portion of

have voluntarily contributed a portion of their salaries to the famine fund. The pupile talk of bringing bread from America 

native must stop when the frest set in. The masses of the people rely entirely upon the Government to help them. This being the state of affairs in the present mild weather, the gloomy prospects held out by the coming winter can be readily imagined.

The track through the tunnel is of extra heavy steer rails, \$100 pounds to the yird. A lining of brick and concrete protects the lower third of the tunnel. The bottom of the tunnel is planked. At suitable places ladders and safety platforms are placed in the tunnel. Wires for lighting are carried through, and by means of incandescent electric lamps it is brilliantly illuminated. The tunnel is dry and there is nothing at all suggestive of its sub-aqueous location. The descent by the open cuttings is g a luna and the change from sunlight to electricity is not at all unchebrful to the traveller. Guard rails of droesoted pine, 10x12 inches, are placed obtside the t.t. el rails of the track. The ties are of crossoted pine, \$8.83 inches square and 9 feet long.

The most wonderful accuracy with which the engineering work was done is shown by the circumstances that the two portions of the boro, working toward the center, met with only the fraction of an inch out of a direct straight line. The direction of the born, working toward the center, met with rankit instruments, set, on misson y, with, a ser-ies of dasks, and a tupe containing crass-wires.
