England and the United States. Alfred Austin, the English poet, utters

Affect Austin, the English poot, utters some frank and generous words concerning the proposition to erect a Lowell momerial in Westminster Abby. "I cannot understand," he says, "any one objecting to its gates being openedate an American on whom, had he been an Englishman, they would not have been closed."

have been closed."

England and the United States are drawn toward each other by the triple link of blood, language, and literature—the strongest bond imaginable. Does any Englishman feel that he is in the society of a foreigner when he is conversing or travelling with an American? We are just as much members of one family as are married brothers or sisters, though they no longer live under one scool. American 2. as are married brothers or sisters, though they no longer live under one yoof. Americans visit us whenever they can do so; delighting us by the unaffected simplicity of their manners, the cheerfulness of their disposition, the inquiring alertness of their minds, and their readiness to make themselves agreeable to everyday and on every occasion. With what hearty hospitality they entertain Englishmen who cross the Atlantic, every traveller who returns from visiting them is eager to record. The pilgrimages they make to every spot in the British Isles associated with the hirth, death, or intellectual activity of departed men of genius, are inspired, in great birth, death, or intellectual activity of de-parted men of genius, are inspired, in great ineasure, by the feeling that they are ren-dering homage to their own ancestors, and, inorcover, are thereby acquirings most just-ly and worthily, credit and honor for them-selves. To this motive must be added that democratic sentiment which with them is a native instinct, while with us, it is as yet hardly more than a reluctant political affe nation, and which urges men who have it to pay honor where honor is really due. If, then, America be willing that the more ont of her children should be honored after death as though they had been Eng-lishmen, surely we ought to rejoice over this fresh evidence of their sense of kinship ernous eyes. "Shall I coll you, sir, mopes more at this station than I do?

who this fresh evidence of their sense of kinship with us. To fester this feeling as Mr. Leslie Stephen and those who agree with him are manifestly trying to do, is the duty, and I should think must be the delight, of every American and every Englishman who values the dignity and desires the well-be ng of his race."
