MARKDALE, MAY 10, 1892.

MARKDALE STOVE FOUNDRY.

We notice our stove manufacturers are to the front with something new in Wood Stoves and Wood Ranges. Their new wood cook "The Crown Pearl" is claimed to be the handsomest, best finished, and has more modern improvements in it than any other stove of its class made in Canada or the United States today. The design and decorations are their own, being made in the wood, and some of the more important are secured by patent.

"The Imperial Pearl" is the name of their coal and wood; this range is warranted to last better, and with less fuel than any other range of its class on the market or no sale. On examining this handsome piece of furniture we find that nothing is wanting to make it almost perfect.

The dampers and controls are such that a kettle or pot can be had to boil on any of its six burners, making it possible to pass the water reservoir.

It is quickly unlike many ranges now on the market.

The burner perfect, provision for making bread, etc., brown sugar, etc., as desired.

Motors are to be considered; they have shown the large firms who have sold them to move to Toronto.

Mr. Thurston of the Travellers Home is unusually busy this season and his house fully deserves the patronage shown it.
