then apply the solution hot to all cracks, closets, bedatead and other places, where closets, bedatead and other places, where any insects are found. Ants bedbags contributed and creoping things are itiled by it; while there is no danger of poissoing the family or injuring the property.

To clean collectiful to must be wiped perfectly dry, as it is weaked. Use little spap and this in tepid water; change often. A good brush and a piece of dry fiannel will make collectiful took like new, especially in make collectiful took like new, especially and the new are manufactor of the make collectiful the new, especially in thouse trusted almost as much as one of the partners, but under some as beavy thus the nouse need not worry about him if he did not turn up at the hour he was don. I hafter washing. If in addition to these preciations, the cloth is varnished annually it is almost indestructable.

WANTED TRE DILLOW

ver from the gatema ore are already on the ground and will soon be induce. These Kuchin mines are the first in Hanchuris to be worked according to the improved methods of Europe and America, and the result of the operation will be awarded with quich interest. According to people belief among the inhabitants of that region, the mountain ranges in the horthern part of Manchuria are exceedingly rich in adver, gold, platinum and other precions metals. Just across the border, on the Russian side of the line, mining has for years been carried on with ground activity in a systematic and chaptate. mining has for years been carried on with great activity in a systematic and elaborate manner, and with extraor linarity profitable results. The Chinese government has, however, hitherthe forbidden any systematic opening up of the mineral regions of its side of the line.

In fact there has been no very great eager has a new the wart.

of the line.

In fact there has been no very great eagerness on the part of minery prospectors to enter that particular district. Some seven years ago a number of Clinese miners went, thither and attempted to open some workings. But they were to the last man may sacred by the troops in Manchuria, who has really half outlaws. The Government had mirections to prevent the opening of mines. The soldiers took it upon themselves to diffill that command by strong the would-be miners. With the child like and pland shrowdness which is characteristic of the race, however, they waited until the luckless miners had been int work some months and had obtained the enormous amount of \$15,000,000 in pold. This plunder was partly divided among the troops and partly put into the pocket of the Governor, of the Province.

After this tragic sucident the governor took possession of the mine which had been opened, and apparently for h fine intended to work them systematically. An experience of American mining enginer was omployed to superintend them, and at a very heavy cost gone collovate and exposive machinery was abtained. Then the whole enterprise was abandoned, just why solvedy seems to know, 'For any private capitalistic to take and gold without the purmission of the Government is a capital of once. True the fifteness is often committed and seldom or prever punished, but these who commit it is scoure immunity by quietly and secrat-

offense is often committed and schlom or never punished, but there who commit it secure immunity by quietly and secretly transferring a share of their booty to the itching pain of the Governor of the district. The metal that is thus illegatly mined finds its way to Pekin, where is reputed to come from some of the few mines worked by the Government.

The Horse in Buttle-When it comes to a battle, a horse

When it comes to a bettle, a horre seems to know everything that is going m; but he does his duty nobly, and seems to be in his cleinent. He enters into the spirit of the battle like a human being. He shows no fear of death; and it is singular that, if his mate is shot down, he will turn to look at him, and seem pleased. A horse in my battery was once struck by a piece of spell, which split his skull. The driver tyride him loose, but he wilked up to the side of the gun and watched the firing, and, when the shot, was fired, would look away in the direction of the energy, as if to see the effect of the shot. When a shell would book at it. When he saw, his own team going back for anynupition he ran back to his own place'and galloped back to the caissons with the rest. When the leutenant pushoof, him aside to put in another horse he tooked at the other sorrowfully white he was being harnessed up, and when he seemjoned at the other sorrowinity while he was no further une for him he lay down and didd. The lieutenant strongly asserted, that he died of a broken heart.

A good time to begin to pray "Thy kingdom come," is when the collection is shout to be taken. Sometimes the pastor is blumed for a poor prayer meeting by a man whose wife told him that he was eating too many pickles for supper.—[Ram's Horn.
