haps a shallow time; but the heat highs are not to be produced in this way, and we selves over and over again to the eye, the stock.

It is addition to what has already been that divide regard to the feeding of diagks, it and the toggeten that they regulie planty argregation. Of course if they have the limit of the land on which they are ununclessed in probabilities are they distance a prediction. All they require the planty argregation in the land on which they are ununclessed in probabilities are they distance a production of the probabilities are they distance a production of the production of th ruining is good, the probabilities are they can obtain for themselves all they require

judgment more of the care and beautiful trees which are called ornamentals surpass in trying to do so, and the land is thrown this one when in lower with its examisite back on A, who is in the same position, and of white and red, says E. P. Bowell in "Forest and Gardege". The love ruined, having speculated with the money. The church ought to emphasize fact of worship and cherry trees. This is not a had description of the average. stainly dark purplish roll, a tint that I have have seen before. Another tree I have seen before. Another tree I have found which, hears blossoms closely approaching scriber in color. My purpose is to secure clous of these trees and have their grafted next spiring, for as flowers they do serve to fank among our richest. Certainly it is worth while to collect examples of such variations so that we go use applebles some carried through their whilest range of color.

The peach is always be outful in flower, but occasionally some individual tree is almost starting in the still place of the peaches by the less conspicuous bloom. The rule seems to be that the finer sorts of peaches by the less conspicuous bloom. The range shade and spiries, is one of the selected and treated as purely as flower are the wild one along the waysie in Kentucky, Missouri, and Arkaness. Some of flees onight to be selected and treated as purely as flower are the wild one along the waysie in Kentucky, Missouri, and Arkaness. Some of flees onight to be selected and treated as purely as flower are the wild one along the waysie in Kentucky, Missouri, and Arkaness. Some of flees onight to be selected and treated as purely as flower are the wild one along the waysie in Kentucky, Missouri, and Arkaness. Some of flees onight to be selected and treated as purely as flower in the heart of the selected and treated as purely as a flowering trees. Cherries, so far as i know, do not have blossoms which sport into colors have blossoms which sport into colors and surge, swarming millions of the Rising Sim, the cultivated Japanese and spiries, is one and the ways of the earliest of the Rising Sim, the cultivated Japanese and spiries, is one way as place in an ordinary shrubbary. They are the well as the surge of mountains and population, the world. The land of the Rising Sim, the cultivated Japanese and spiries, is one and the way as place in an ordinary shrubbary. They are the well as the collection of the service of the complete of the collection of the s

satisfied. Stocki dicks ought to be fed twice a day thirt; as early as possible in the morning; and second, about an hour before they retire for the evening; the former should always be as adon after deylight as can be. It is an excellent plan to the water in which the birds swin or bath during the day.

With regard to the question of water, we are firrally of the opinion that, in order to succeed in breeding ducks, it is necessary to baye water in which the stock can swin. Without this the young birds will never be avered and within the strong or healthy, but, it is not difficult to make a direk pond if there he an insufficient supply of water naturally. There can also be no question that ducks which have a good pand do not east naturally so much to the water in whoch the stock which have a good pand do not east naturally so much to the supply of water naturally. There can also be no question that ducks which have a good pand do not east nearly so much to the can oppose to the condition of the fight or pond, where they find worms galore, and of the rimportants elements in their natural should be a supermost their instable reversible waterfall. As there we in the works in the works in the works of course it is accepted in this works. Of course it is accepted in this works. Of course it is said known that many duck flogs are bridged whose parents have no water except perhaps at shallow inter but the heat birdle are not to be produced in this two course it is said water is forced backwards up the river and forms a waterfall to the reverse way. Of the subsequent journey to Toronto, Mrs. Vincent says that two features repeat themselves over not expect the subsequent for the subsequent forms are not to be produced in this two.

then "on to Vancouver." Fort William has a great future before it," while the in this regard. It not it must be supplied, and it have desirable to giveduck their full since of gazden stull available—calificated in the supplied of the content of the

The course of the water supply of a greatly is watched with the utindst diligen to see that it is kept pure, for the introduction of poisonous matter at the fountai head means the carrying of death and destruction to every household. Childhood is the source where the carrying of the control is the source where the carrying of the control is the source where the carrying of the carrying the carr

struction to every liousehold. Childhood is the source whence comes our manhood and womanhood, and if youth is corrupted and poisoned the terrible results are carried into the very bosom of society.

We have long had something like an adequate idea of the importance of surrounding those of our children who are borninto homes of purity and refinement with the best influences that church and school and segretare and ences that church and school and society and literature afford. But we have not been equally solicitous to reach and rescue those argument from antiquity, the other is the argument from excellence.

The use of a book of prayer is older that the Christian era: it goes back into the days of the earlier dispensation. Our Lorl and his apostles, who attended the services of the temple and the synagogue, used this prayers which were there read out of the appointed books. Jesus himself not only gave a form of prayer which his disciples might make a part and pattern of their devotious, but he chose the phrases of it, for the most part, from the familiar sentences of the pople use a form of prayer, they use a way of worship which was used by Christian world. Eyery church, had is alied. This example was followed, down to the days of the Retormation, by the whole days of the Retormation of power the provention of juvenile delinquency.

were well up with Cape Frio when the men came to me in a body during

THE MORNING WATCH

to make a complaint. They were headed by the carponiter, who declared that for the past two nights the watches below had been disturbed by strange noises and could not sleep. The bark had the old-fashioned for dastle instead of the deck house, and the noises had seemed to come from behind the bulkhead dividing the fo castle from the bulkhead dividing the fo castle from the bulkhead dividing the fo castle from the bulkhead dividing the forest from the bulkhead dividing the forest from the bulkhead dividing the forest form the manding to know the reason of this singular action, I was told that the queer noises referred to had been heard again and again. saingular galley to act as cook, and I don't think i

action, I was told there the queer noises referred to had been headd again and again, and the crew were as good as upset over them. Had the "old man" been on deck, he would have seized a belaying pin and driven the watch below and cracked three or fohr heads. He had no patience with sallors weaknesses. I was tempted to give them, a bit of my mind, but all were so serious and earnest that it seemed only reasonable to investigate. I went into the fo'castle and spent fifteen minuted listening for sounds. The bark had all plain sail on and was heeled to port, and for the first all we met and bales rubbing together. Then, of a sudden, I heard only the sounds of boxes and bales rubbing together. Then, of a sudden, I heard a voice singing. It was a faint; far-away voice, and I had to listen closely, but it certainly was a human voice. It was impossible to locate; it. It seemed to come from above as mach as in any other of the hands might be playing a joke.

"It will be anything but a joke for the man who's playing this if I can eatch him at it," I said as I gained the deek and found that, as I anything but a joke for the wasting for me.

"It will be anything but a joke for the wasting for me.

"It will be anything but a joke for the wasting for me.

"It will be anything but a joke for the wasting for me.

"It will be anything but a joke for the wasting for me.

"It will be anything but a joke for the wasting for me.

"It will be anything but a joke for the wasting for me.

"Mr. Merwin, did you hear aught down well as a man abroad but whon the boat had both watches grouped around the hatch and waiting for me.

"Mr. Merwin, did you hear aught down well as compassion and beon sailing to make the capacity to take a compassi, and beon sailing to make the capacity to take a compassi, and beon sailing to make the capacity to take a compassi, and beon sailing to the capacity to take a compassi, and beon sailing to make the capacity to take a compassi, and beon sailing t and grace to get account. They had gone off intending to make the coast, but had fore gotten to take a compass; and been sailing almost at random. The "ghost" was there to welcome them on board, and when they got her story and realized how idiotic had been their action, no set of men were ever more disposted, with themselves or more disposted, with themselves or more anxious to attack for the state.

waiting for me.
"Mr. Merwin, did you hear aught down

below ?" asked the carpenter, speaking for

"Not down there, but I heard someone

"Yes."

"And that's what the men complain of sir—singing most of the time, but now and then something like praying and calling after her that he'd have the law on fer factor her that he'd have the law on fer factor her that he'd have the law on fer factor her that he'd have the law on fer factor her that he'd have the law on fer factor her that he'd have the law on fer factor her that he'd have the law on fer factor her that he'd have the law on fer factor her that he'd have the law on fer factor her that he'd have the law on fer factor her that he was a law to have the law on fer factor her that he'd have the law on fer factor her that he'd have the law on fer factor her than her that he had been something the have the have the had been something then something like praying won't hart out."

"Well, singing and praying won't hart any of you, even if it's that. It's in the cargo, however. We've got three or four old pianes ahourd going to England to be fixed up, and it's the boxes rubbing together which makes the singing sound. It's tree she wasn't out of Liverpool in an hour. this one when in lower with its examistic stands of white and red, stays E. P. Powell in "Forest and Gardger". The dove of the depantise for plant and cherry trees and the depantise for the plantise for the plantise depantise for the depantise for the depantise for the depantise for the plantise for the plantise for the plantise for the plantise for the depantise for the solemn material depantic for the depantise for the solemn material depantic for the depantise for the solemn material depantic for the plantise for the plantise for the plantise for the solemn material depantic for the depantise for the solemn material depantic for the plantise for the solemn material depantic for the plantise for the solemn material depantic for the solemn mater came from them. It no doubt looked reasonable to the sailors, as nothing more was heard from them that night. I was off at 4 and on again at 8 next morning. The biggers

sonable to the sailors, as nothing more was heard from them that night. I was off at and on again at 8 next morning. The breeze had died out and we were on an even keed and not making over two miles an hour. It had one 9 o'clock. The Captain was over hauling some papers in the cabin, the men were all at work on jobs, and I was pacing the quarter and keeping an eye on a bit of sail showing to windward of us when a shout of terror rang through the ship.

A had a smed Thomas Burns had been into the foeepeak after something wanted on deck, and it was he who called out as he tumbled up and seemed for a noment to contemplate going overboard. The yell brough the captain on deck, and then the story of the strange noises came out. He was furious. Burns declared that a human voice had called to him while he was below, and the rest of the orew stood by him with regard to? the singing and praying but the "old man" was mad enough to kill some one. He drove them forward and then followed them up and cursed and berated threatening to put any man in irons for the rest of the voyage who let it be known that the heard the singing again.

As the days and nights passed and our Captain heard nothing further from the men hed began to boast of how he had dissolved the mystery and put Jack's suiperstitions to flight. The second mate and I knew better, however. The queer noises continued, and the men had become so reattled that the men had become so reattled that the was book of their pipes, and klept very wide awake. The discipline of the shory was being unset by a mentioned at the captain of the pipes, and klept of the whole Labrador party consists of the ship was being unset by a mentioned at the mental and become so reattled that the was below in uset by a mentioned at the mental and the mental a

began to boast or now mystery and put Jack's superstitions of flight. The second mate and I knew better, however. The queer noises continued, and the men had become so rattled that the watch below smoked their pipes, and kept very wide awake. The discipline of the ship was being upset by a mystery, and if which also bothered me. On two other occasions I had entered the fo'castle and plain by heard the uncanny sounds, but was not able to locate them to my satisfaction, of outside the property sure, however, that they can able to locate them to my satisfaction, of outside the property sure, however, that they can also to from the forehold, and one afternoon I told an commandation of the whole story to the Captain and suggested that the forward hatch be removed and that the forward hatch be removed and and made in the first of the schooler is a liand that the forward hatch be removed and a general collection of curiosities from the whole story to the Captain and suggested that the forward hatch be removed and a general collection of curiosities from the whole story to the Captain and suggested that the forward hatch be removed and a general collection of curiosities from the supplies.

It is almost impossible to think of some accounts of the supplies.

It is almost impossible to think of some men reaching a good old age. "You want a job in my store, hey? Have Some and the part of the part with me."

But he says he very glad to part with me."
