Housekeeper's Corner.

Keep flowers frosh by putting a pinch of

The Statements Differ Widely, But Some Them Are Very Precise. I have often wondered where M. Henrion I have often wondered whore M. Henrion, the French savant, got his data for the curious speculations he gives as to the height and other proportions of Adam and Eve. In his remarkable work, "The Degeneration of the Human Race," published in 1718, the learned academician gravely informs his readers that Adam was 123 feet and 9 inches in height, while his disobedient consort was but a pattry 118 feet from the sole inches in height, while his disobedient con-sort was but a paltry 118 feet from the solu-of the foot to the crown of the head. Of course all who have read very extensively-of Talmudick literature, or even Baring-Gould's "Legends of the l'atriarch Proph-ets," remember the wonderful stories told of how Adam was made; of his gigantic size, and how, after the fall, his stature was reduced several miles by the offended God himself. The Talmud her whit to was of himself. The Talmud has this to say of Adam's height: "He was so tall that he stood with feet on earth and flead in Heaven until God pressed him down at the time of the fall." Rabbi Jhuda says that when he lay on the earth "his body completely covered it." Another Talmudib story says: "to judge how long he wan, understand that his body stretched from one end of the earth to the other, and it takes a man 500 years to the other, and it takes a man 500 years to walk that distance. The angels were awed with wonder when they saw that gigantic human being and bowed before him, crying, 'Holy, hôly, holy.' Then God reduced his size by cutting off great chunks of flesh." These are all absurd legendary stories, of course, but where did Henrion get his figures for the 123-foot calculation wentioned

Liquor dealer who opened a place for siness in Columbia, Mo., recently started with a determination to justify and Jaily his business and lift if from the level stalls with the second stalls with the second stalls with the second stalls with the second second stalls with the second second stalls with the second seco ures for the 123-foot calculation in the opening? ally assigned to it. his breast to meet the breeze. A shorter way is to compare the lag with the compare, and, not to trouble about catching a king-fisher; in fact, I never knew anyone who had, ever caught a king-fisher. When a sailor is drowned, his soul goes into a stormy petrel, and would have a very good time indeed, if there were any rum about.

Lastly, do you know where sea bir.ls—such as nullins shows, and the like are lived and he are lived. Lastly, do you know where sea incossuch as pullins shage, and the like are bred? Out of eggs you think. Nothing of the kind. They are bred in the decaying time kind.

Tea-Chest Load One of the industries in connection withhe tex trade is the collection of the lear with which tea-chests are lined. . China has been noted for many cof its lead, and this of its lead, and this teachest lead, as it is called, is regarded as the times in existence. There are many uses for it; it is found very valuable in making the best kind of solder. No machinery's employed in the production of this sheet lead; every sheet is made by hand in the most primitive fashion. A large brick is provided, the size of the sheet of lead to be made, and is covered with two or three sheets of paper. On these the molten lead is poured, and another brick is placed on the top, which flattens the lead out the jequired size and thickness. The sheets are then soldered together to the size of the interior of the tea-dnest; the tea is packed in, and theftop sheet is fastened in place. The working hard are very expert, and; they turn out an immense number of sheets in the course of a day, and, where labor is so cheap, at a price much less than if the articles were produced by machinery. called, is regarded as the tinest in exister

An English Tragelly. mystery of the headless and armile body of a woman found in a sack near Al-thorpe, Northamptonshire, has been cleared up. The woman, who was identified by a ap. The woman, who was an in Prichard, piece of a chemise, was Annie Prichard, who had been living with Rae Anderson and Northampton. Anderson was found to be the assumed name of Andrew McKae, manager of a warcholes in Birmingham, who has a family land was living a double manager of a warcholese in Birmingham, who has a family land was living a double life. In June Miss Pichard had a child. Melkae, was arrested and his office was searched, and in the fireplace were found the bones of a child and the arms of a woman. Detectives discovered that the girl's child was murdered in the house occurried by the vicinia and her practices. cupied by the victim and her paramour. The girl was decapit sted, and the head with the arms, which were sawed off, and the baby were taken to Birmingham and cremated in McRae's office. Being unable to dispose of the truth and limbs in this manner the fiend place I them in a sack with lime and duniped them where they were ound some days later.

The largest and finest yew in Scotland is at Braigends, Renfrawshire, It is of conical shape, and being a comparatively young tree, is in a most vigorous condition. It covers an area of about two hundred an y feet in circumference, and rises to a ght of forty feet. The bold is eight feet in diameter. This is a grand specimen, and worthy of a visit by any one who apreciates the sublime beauty of trees, and reciates the sublime beauty of trees, and finds in their presence that "soothing companionship" which Oliver Wendell Holmes o clo uently praises.

There is also a group of yows, forming the beauty by the sublime the sublime to the noble avenue, mear the thurch at Roseneath on the Gareloch. It sands not far distant from the grand silver firs which are the largest of their kind in the kingdom.

is a carved and painted board, done in low a relief and representing her as she was in life, with white gown and costume complete. Every detail of her person is carefully reproduced, even to her dainty almond-shaped nails. She was a blonde and evidently very beautiful. Though she died more than 1000 years ago, how interesting it would be to know something of her story.

Frightful Death of au Adventuress. .

Columns of the French press have been filled this north with accounts of the extraordinary swindles perpetrated by Madame lyreferred loa Count Felson, whomshestyled Count Chamberlain, and his wife, a Lady of Honour, through whose influence she was obtaining her orders, and hoped finally to obtain her money. None of her victims seems to have been struck with the simple idea of inquiring after the status of this Count, Felson, who never existed outside Afparuti's injugitation. Finally, however, one of her crediters entered a claim against her, upon which she came to Russia, and from St. Pelershing continued to try and keep up the fable. The French Court, nevertheless, give an order for her arrest, and the necessary formalities for her extra-dition were conjugueed. At that time she was staying in a fashionable hotel, where, however, she was kept under close surveillance. The other night, finding the game was up, Madame Apparuti undressed, derenched berself. A short while before she had insured ber life for a considerable sum, and step that insured her life for a considerable sum, and step that insured her life for a considerable sum, and step that insured her life for a considerable sum, and step that they for this hone, thouch it was discover. be attributable to accident, and that the insurance money would be paid. Unfortunately for this hope, though, it was discovered that before setting light to her night-dress, in order probably to make assurance doubly sure, she had cut the veins at the root of her tongue with a pair of scissors. The wretched woman was transported to the hospital of St. Nicholas, where she died the next day, and was immediately burled. Three days later the Russian authorities informed the French Consulate that all was induced in the french Consulate that all was induced for her extradition, and it was only order for her extradition, and it was only hen that the facts of her tragic end became

A DOUBLE TRAGEDY.

SwiftVengrance of a Daughter on the Mur A Bloomington, Ind., despatch says:

At Payne, this county, shortly after midnight. Richard Wright and his daughter were awakened by a shot. The man recognizing the voice as that of his son-in-law, Dole Judah, went out towards the fence, when a shot was fired by Judah. Wright ran back into the house and got an axe, and started toward Judah, when a sculle ensued. The old man was shot once in the head and The old man was shot once in the head and twice in the neck, killing him. His daughter secured the axe and struck Judah on the

Henry George's Standard, just suspended, once had a circulation of between 50,000 and 75,000 but it steadily rank in circulation during the last three years of its existence save for a short time when a special clort was made to obtain new sub-scribers. Oddly enough, however, it came nearer paying its way during the last year than at any time since its brief season of early prosperity. Its circulation like that the Atunnel, the longest in the world, has been projected and begun, practically, under Simplen, to supersede the famous State road over the mountain constructed by
